

Root Canal Singapore Opens at 60 Robinson Road, SBF Medical Centre, Strengthening Access to Specialist Dental Care

SINGAPORE, SINGAPORE, SINGAPORE, August 19, 2026 /EINPresswire.com/ -- Root Canal Singapore (Dr. Seah Root Canal + Implant Surgical Clinic) is expanding its presence in Singapore with the opening of a new branch at 160 Robinson Road, SBF Medical Centre, marking a significant milestone for the dental clinic as it continues to provide specialist and comprehensive dental care.

The new branch marks a significant milestone for the dental clinic, enhancing access to dental treatment for patients seeking a range of procedures, including dental implants, endodontic surgery, veneers, dental bridges, dental crowns and wisdom teeth extraction. With its established focus on endodontic and restorative dental care, the new location further strengthens Root Canal Singapore's presence within Singapore's dental healthcare landscape.

Led by Dr. Seah Yang Howe, Root Canal Singapore provides a range of treatment options addressing various dental needs, with particular expertise in procedures involving the tooth's internal structures and tooth replacement. The clinic's expansion to Robinson Road reflects its continued development and commitment to providing patients with access to professional dental care. Root Canal Singapore provides a range of treatments under one practice, including procedures addressing complex dental conditions as well as restorative and cosmetic concerns.

The clinic also continues to keep abreast of developments within the dental profession. One recent industry development highlighted by the practice is the introduction by the Singapore Dental Council of a Certificate of Competency for dentists with less than 20 years of experience performing wisdom tooth extraction procedures. The development reflects the importance placed on competency and appropriate professional standards when carrying out dental procedures.

"Opening our new branch at 160 Robinson Road, SBF Medical Centre is an important milestone for us," said Dr. Seah Yang Howe. "We look forward to continuing to provide professional dental care while making our services accessible to patients in the area."

Beyond clinical services, Root Canal Singapore continues to support community initiatives through its ongoing volunteer work at Singapore Cheshire Home. The clinic has also taken steps towards more environmentally responsible day-to-day operations, including its move from

conventional plastic cups to waxed paper cups as part of its efforts to reduce reliance on plastic.

The new Robinson Road branch represents another step in the clinic's continued development while maintaining its commitment to providing patients with access to a broad range of dental treatments. From tooth-saving endodontic procedures to dental implants and restorative treatments such as crowns and bridges, Root Canal Singapore aims to support patients across different stages of their dental care journey.
