

Pearland ISD Names Typesy Approved Instructional Supplies Vendor

Pearland ISD names Typesy an approved instructional supplies vendor under RFP 25-0314-2, through June 2030.

PEARLAND, TX, UNITED STATES, August 19, 2026 /EINPresswire.com/ -- Pearland Independent School District has approved Typesy, eReflect's K-12 typing and keyboarding curriculum, as a vendor under RFP Number 25-0314-2, Instructional Supplies, Training Aides, & Printed Material, through June 30, 2030. The approval places Typesy alongside other instructional materials the district has cleared for use, giving campuses the option to adopt it, with the decision left to individual schools.

“

Instructional supplies used to mean paper and pencils — now that category has to account for digital skills too. Placing Typesy there gives schools a straightforward way to bring it in.”

Rick Mesias, Sales Director at eReflect

Instructional materials have expanded well beyond textbooks and worksheets, and schools now often think about digital tools alongside more traditional supplies when planning which vendors to formally approve for

classroom use.

Pearland ISD's approval places Typesy within its instructional supplies and training aides category, positioning the program alongside other classroom resources rather than as a standalone technology purchase separate from everyday teaching materials, ahead of any specific campus committing to it.

[Typesy for Pearland ISD](#) is a K-12 typing and keyboarding curriculum delivered through guided lessons, interactive exercises, and classroom-focused activities designed to improve typing speed, accuracy, and keyboard familiarity. For schools that choose to adopt it, students can build fluency at a pace suited to where they're actually starting from rather than a fixed pace set for the whole class.

Campuses that bring Typesy on can assign lessons, monitor keyboarding progress, and review performance data through built-in reporting tools designed to simplify implementation and identify students who might benefit from additional practice.

Designed primarily for K-12 education, Typesy is built to help students strengthen digital fluency,

foundational computer skills, and overall familiarity with classroom technology through guided practice exercises, for campuses that choose to adopt it.

While Typesy also offers homeschool and individual account options, its primary focus remains school-based learning and district-wide keyboarding instruction. Pearland ISD campuses that opt in can implement the curriculum as part of classroom instruction, intervention support, or independent practice depending on each school's needs.

Because the RFP also covers training aides, Pearland ISD campuses that adopt Typesy have room to pair the software with supporting materials that help teachers introduce keyboarding practice, once a school makes that decision, without adding significant new prep work.
