

Global PayEX and Trade Technologies Partner to Bring AI-Powered Financial Automation to Multinational Exporters

Strategic alliance brings Global PayEX's AI-powered accounts receivable, accounts payable, and embedded finance suite, to Trade Technologies' global customers.

AUSTIN, TX, UNITED STATES, August 21, 2026 /EINPresswire.com/ -- [Trade Technologies](#), the leading provider of trade finance automation, connectivity, and transaction management services, today announced a strategic cooperation with [Global PayEX](#), a

leading provider of AI-powered accounts receivable (AR) and accounts payable (AP) automation solutions, serving more than 200,000 buyers and sellers across Fortune 500 enterprises and 25,000+ SMBs. The alliance brings together the TradeSharp global trade management platform, used by more than 1,500 exporters, freight forwarders, and trade banks worldwide, with Global PayEX's broad suite of AI-powered AR, AP, and B2B embedded reconciliation capabilities.

The partnership is intended primarily for Trade Technologies' largest customers, many of whom manage receivables and payables across multiple currencies, subsidiaries, and banking relationships, and have long relied on a mix of manual processes and fragmented point solutions to keep reconciliation under control. Multinational treasury teams face mounting pressure to manage working capital and risk amid longer credit cycles and tightening credit conditions worldwide. For instance, an exporter collecting payments from buyers across a dozen countries and banking relationships will be able to have incoming payments automatically matched to open invoices, regardless of currency or remittance format, with exceptions flagged and resolved in a single dashboard instead of reconciled by hand across spreadsheets and multiple bank portals. Those customers will now have access to Global PayEX's platform, bringing that long list of reconciliation processes under one roof rather than managing them piecemeal across multiple systems.

"Global trade creates reconciliation complexity that most AR/AP tools weren't built for — multiple currencies, multiple subsidiaries, multiple banking relationships, all generating

exceptions that pile up in finance teams' inboxes. Trade Technologies' customers are dealing with exactly that problem at scale. This partnership is about giving their treasury teams one place where all of that gets resolved automatically, with the controls and auditability that enterprise finance requires", said Abhilash Edakadampil, Co-Founder, CTO & CISO, Global PayEX.

"Reconciling payments for AP and AR transactions is too often a complex, manual process for even large multi-national treasury teams. While there are an abundance of solutions for reconciling AP and AR transactions, we partnered with Global PayEX for our customers that are managing a large number of complex vendor and customer invoices and payments," said Kirk Lundburg, Chief Executive Officer, Trade Technologies. "Global PayEX delivers a single solution with all the AI, integration, embedded finance and support tools necessary to simplify and automate reconciliations across a complex global business."

The partnership is effective immediately, with joint go-to-market activities and integration work already underway. Customers of both companies can contact their respective account teams to learn more.

About Trade Technologies

Trade Technologies is the leading provider of trade finance automation, connectivity, and transaction management services. Established in 1999, the Company has processed almost USD 195 billion in successful trade transactions for thousands of Exporters. Trade Technologies' innovative solutions, including TradeSharp™ and TradeBridge API, automate and digitize the creation, management, and delivery of documents and data between Corporates, Banks and Buyers. With a global presence in 16 offices across Asia, EMEA and North America, the Company offers a unique blend of technology and expert trade services that optimize transaction processing, enhance cash flow, and provide end-to-end visibility. Customers benefit from faster, more reliable payments and reduced costs.

About Global PayEX

Global PayEX is an AI-powered fintech SaaS company delivering end-to-end accounts receivable (AR) and accounts payable (AP) automation for mid-market and enterprise B2B organizations. Its unified platform encompasses electronic invoice presentment and payment (EIPP), AI/ML-powered cash application, collections management, AP automation, B2B embedded channel finance, and multibank consolidation. The platform integrates natively with any ERP, extending enterprise finance capabilities by up to 5x. Customers including 3M, GSK, Bridgestone, and Stanley Black & Decker have achieved up to 30% reduction in DSO, 40% lower AP processing costs, and 3x–10x ROI within 12 months. The platform serves a network of more than 200,000

buyers and sellers across Fortune 500 enterprises and 25,000+ SMBs, with strategic banking partnerships including Deutsche Bank, Axis Bank, BNP Paribas, BMO, and Citi. For more information, visit:
