

Stanton University Announces New Diploma in Applied Artificial Intelligence

ANAHEIM, CA, UNITED STATES, August 19, 2026 /EINPresswire.com/ -- [Stanton University](#) is proud to announce the approval of its new [Diploma in Applied Artificial Intelligence](#) by the WASC Senior College and University Commission (WSCUC). This milestone reflects the University's commitment to innovative, career-focused education that prepares learners for the evolving demands of the modern workforce. The program is designed to be accessible to learners from diverse academic and professional backgrounds, including those without prior experience in computer science or programming.

Practical Skills for an AI-Driven World

[Artificial Intelligence](#) is transforming industries such as business, healthcare, education, finance, marketing, and technology. As AI becomes an increasingly important part of the modern workplace, professionals across disciplines need the knowledge and confidence to use these technologies effectively. Stanton University's new diploma emphasizes practical, real-world applications of AI, helping learners enhance productivity, support decision-making, automate processes, solve workplace challenges, and drive innovation.

Stanton University advances innovative education with the launch of its new Diploma in Applied Artificial Intelligence.

The program reflects Stanton University's commitment to preparing learners for an increasingly AI-driven world.

The program also promotes the ethical, responsible, and secure use of AI, preparing learners to navigate the opportunities and challenges associated with the rapid growth of artificial intelligence.

Preparing Learners for the Future

At Stanton University, we believe higher education must evolve alongside technological and workforce changes. The new Diploma in Applied Artificial Intelligence reflects this commitment by providing accessible and industry-relevant education that supports lifelong learning and professional growth.

As AI continues to reshape the way people work and organizations operate, Stanton University aims to empower learners with the skills and confidence to adapt, innovate, and create meaningful impact in their careers and communities.

Stanton University extends its sincere appreciation to everyone whose dedication, collaboration, and hard work contributed to the development and approval of this new program.

The future of education is not simply about learning AI—it is about empowering individuals to use AI to solve real-world challenges, drive innovation, and create meaningful impact.
