

Ontario Homeowners No Longer Have to Wait Weeks for a Dry Basement — Aquatech Explains Why

New waterproofing process helps homeowners protect their basements faster while reducing disruption inside the home.

TORONTO, ONTARIO, CANADA, August 19, 2026 /EINPresswire.com/ -- Aquatech Basement Waterproofing has introduced a new basement waterproofing system designed to make installations faster and more efficient for Ontario homeowners.

When water starts entering a basement, homeowners usually want the problem dealt with as soon as possible. A wet basement affects how the space is used and, if left untreated, water will continue to cause problems within the home.

“

Most homeowners want their basement fixed as quickly as possible so they can get back to enjoying the space. We've found a way to speed up the installation without sacrificing the quality of the work.”

The Aquatech Waterproofing team is ready to help repair your leaky basement

Aquatech has been waterproofing basements across Ontario for 25 years, consistently looking for ways to improve how projects are delivered. The company's new direct-to-crew project model removes third-party contractors from the process entirely. This gives Aquatech full control over scheduling, quality, and start times from the moment a homeowner approves the work.

A FASTER WAY TO WATERPROOF A BASEMENT

The biggest difference comes down to who is doing the work.

Aquatech hires full-time, experienced waterproofing crews. What does this mean for

homeowners? Aquatech will manage projects from the initial estimate through to installation without relying on outside contractors.

This helps speed up one of the most frustrating parts of hiring a basement waterproofing company: waiting for the work to begin.

Aquatech has heard firsthand that some homeowners can sometimes wait six to eight weeks between their initial call, estimate and the start of their waterproofing project. Aquatech's in-house approach allows the team to move much faster, with many projects able to get started in roughly half that time.

The Aquatech team completing another basement waterproofing repair job for an Ontario family.

Keeping the work in-house also gives Aquatech greater control over scheduling. Once a homeowner approves the work, the team coordinates the next steps immediately instead of waiting for the availability of a third-party contractor.

For homeowners dealing with a leaking or wet basement, a shorter turnaround makes all the difference. They spend less time worrying about the next rainfall or wondering if the problem will get worse before someone can get there. The work gets scheduled sooner, the project gets underway faster and homeowners can get back to using their basement normally.

"Most homeowners want their basement fixed as quickly as possible so they can get back to enjoying their space," said Andrew, Aquatech Basement Waterproofing. "We've found a way to speed up the installation without sacrificing the quality of the work."

WHAT THE NEW SYSTEM MEANS FOR HOMEOWNERS

For homeowners, a faster waterproofing process helps them get back to normal sooner.

Basement work is typically disruptive, especially when crews need to access finished or frequently used areas of the home. However, a more efficient system helps reduce the amount of time spent working in the space and keeps interruptions to a minimum.

Homeowners can also address water problems sooner instead of waiting weeks for work to begin. When there are signs of a leak, moisture or foundation issues, a shorter turnaround provides some much-needed peace of mind, especially when more rain is in the forecast.

Aquatech Basement Waterproofing has served homeowners across Southern Ontario for more than 25 years, providing interior and exterior waterproofing, foundation crack repair, sump pump installation and other basement waterproofing services.

With its faster system and dedicated in-house crews, Aquatech is continuing to make basement waterproofing simpler and more convenient for homeowners.

BACKED BY A 25-YEAR TRANSFERABLE WARRANTY AND PRICE MATCH GUARANTEE

Speed is only part of the value Aquatech delivers. Every basement waterproofing project (regardless of size or scope) is backed by a 25-year transferable warranty, one of the strongest guarantees in the Ontario waterproofing industry.

Aquatech also offers a price match guarantee: homeowners who receive a lower written quote from a licensed competitor for equivalent work will have it matched, without compromising on materials, warranty, or the in-house crew model.
