

Window Seal West Keeps Window Manufacturing Local

Calgary window and door company manufactures its products locally, giving the team greater control over quality, customization and the full replacement process.

CALGARY, ALBERTA, CANADA, August 20, 2026 /EINPresswire.com/ -- -

Window Seal West is continuing its commitment to local manufacturing, producing windows at its Calgary facility for residential projects in the city and surrounding communities.

The company has operated in the window and door industry for more than 20 years. During that time, Window Seal West has kept manufacturing as part of its local operations rather than separating production from its installation services.

Windows produced at the Calgary facility are manufactured according to measurements taken for individual projects. The process brings manufacturing, project coordination and installation together within the same company.

“

Having our manufacturing team right here in Calgary gives us direct control over the products we install in our customers' homes. We know where each window is made, who makes it and what goes into it.”

INSIDE THE CALGARY MANUFACTURING PROCESS

Window replacement projects begin with measurements of the existing window openings. Those measurements and project specifications are then used during manufacturing at the Calgary facility.

Window Seal West uses manufacturing equipment to produce windows in a range of sizes, configurations and

styles. This allows the production team to work with the specifications of individual properties,

including homes where window dimensions may differ from standard sizes.

Keeping manufacturing in Calgary also allows Window Seal West's production and installation teams to communicate directly when questions arise during a project.

"Having our manufacturing team here in Calgary keeps us closely involved throughout the process," said Vlad of Window Seal West. "Our team knows where the windows are being made and how they are being produced before they leave our facility."

Once production is complete, the windows are prepared for delivery and installation.

KEEPING A LOCAL APPROACH TO WINDOW PRODUCTION

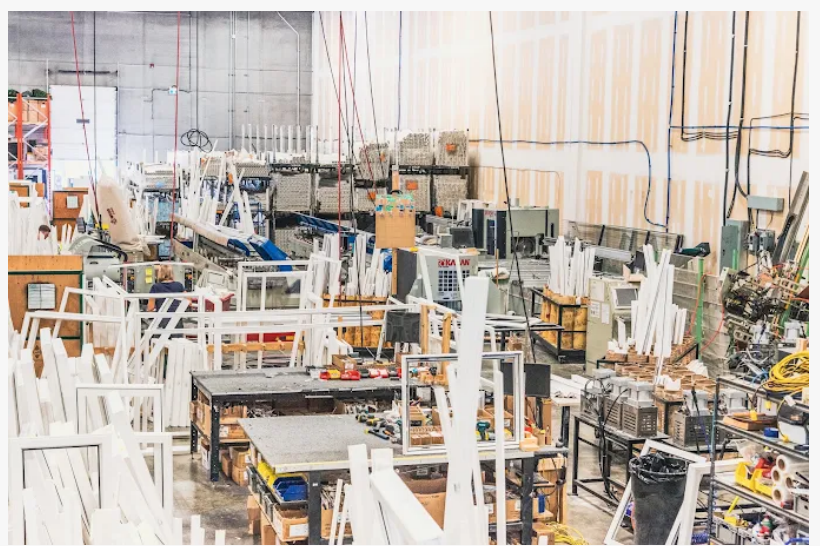

The decision to manufacture locally has remained part of Window Seal West's operations as the company has expanded beyond Calgary.

Window manufacturing also requires consideration of the conditions the finished products will experience. Southern Alberta sees significant changes in temperature throughout the year, from cold winter weather to hot summer days.

Window Seal West manufactures energy-efficient window options for residential properties and offers a variety of glass, frame and configuration choices. The company also supplies and installs exterior doors.

While its manufacturing operations remain based in Calgary, Window Seal West now serves customers in communities across Alberta, Saskatchewan and British Columbia.

The Calgary facility continues to play a central role in the company's operations after more than two decades in the window and door industry. Window Seal West plans to continue manufacturing locally as it serves residential projects throughout Western Canada.

The Window Seal West warehouse located in Calgary, AB.

A completed project by the Window Seal West team.

More information about Window Seal West's Calgary manufacturing operations, windows and doors is available at their website.
