

# IPcook Debuts Referral Program with 10% Recurring Commission

*New referral initiative lets approved participants earn commissions from every valid order placed by referred users during their first 365 days.*

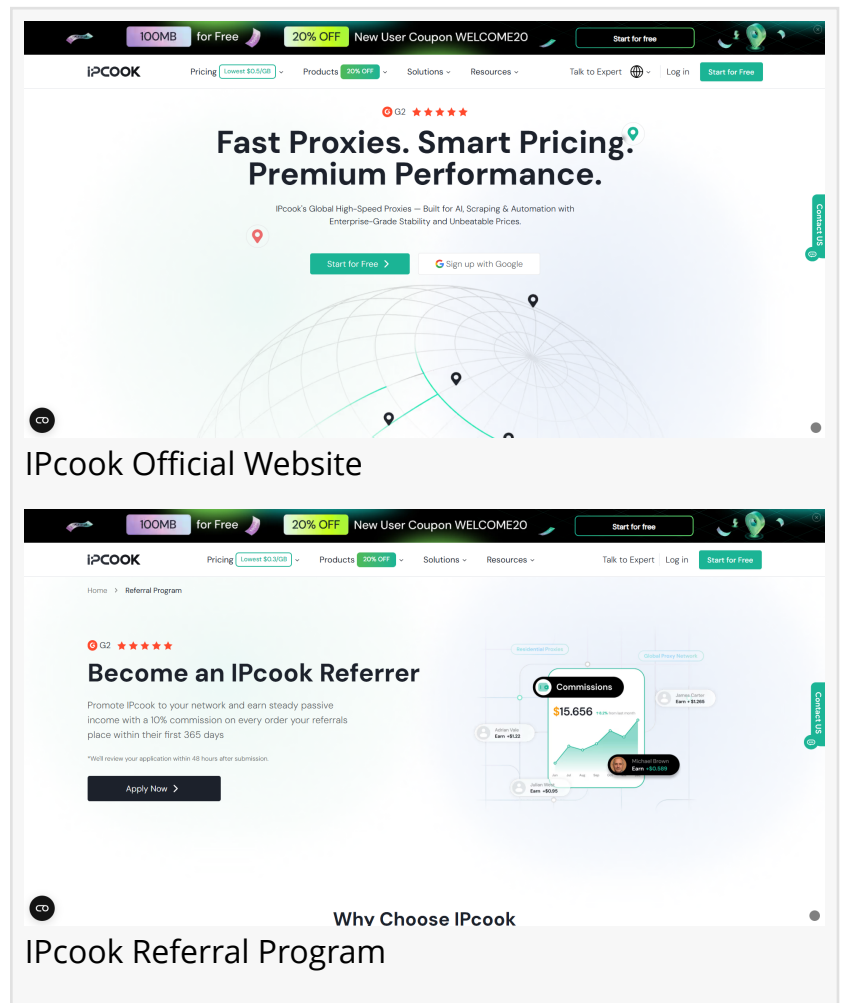

NEW YORK, NY, UNITED STATES, August 20, 2026 /EINPresswire.com/ -- [IPcook](#), a global proxy service provider, recently introduced the [referral program](#), giving customers, creators, marketers, and industry partners a new way to earn commissions by recommending its proxy services. Approved referrers receive a unique referral link and earn a 10% commission on every valid order their referrals place within 365 days of registration. Applications are reviewed within 48 hours, and accumulated commissions can be withdrawn once the \$5 minimum threshold is reached.

## IPcook Introduces Its Referral Program

The referral program expands the ways users can benefit from their relationship with IPcook. The program pays a 10% commission on every valid order that a customer places during the first 365 days after signing up.

IPcook created the program to reward customers and partners who introduce its proxy solutions to people in their networks. It also gives publishers, creators, and marketers a structured way to earn from relevant recommendations rather than relying on one-time promotional campaigns.

The launch reflects IPcook's focus on building longer-term relationships with users who

understand proxy services and can explain their applications to new customers. By connecting commissions to valid purchases, the referral model benefits participants when their recommendations lead to genuine product use. The program is now available through the IPcook website, where prospective referrers can review the details and submit an application.

### Earn Ongoing Commissions Through Qualified Referrals

Unlike referral programs that reward only an initial purchase, IPcook's model provides ongoing earnings throughout the first year after a successful referral. This approach offers participants the opportunity to generate recurring commissions as referred users continue purchasing proxy services.

Participants can monitor referral activity and commission earnings through the affiliate dashboard. Once commissions reach \$5, they can be converted directly into the IPcook account balance or withdrawn to an eligible payout account. Using commissions as account balance can help existing customers reduce the cost of future proxy purchases.

Withdrawal requests are accepted monthly between the first and third day of the month. The low minimum payout makes accumulated earnings more accessible to users who are beginning to promote IPcook. Together, the 10% rate, year-long commission period, and flexible reward options give participants a clear and measurable incentive to share the service.

### How to Join and Start Earning

Joining the IPcook Referral Program begins with a short online application. IPcook reviews applications within 48 hours of submission. Once an application is approved, the participant's account is activated for the referral program. After logging in to the affiliate dashboard, participants can access a unique referral link and begin sharing it with their audience.

The process follows four main steps:

1. Apply to join the Referral Program through the official IPcook website.
2. Wait for your application to be approved.
3. Log in to the affiliate dashboard to access your unique referral link.
4. Share the link and track referrals and commissions in the dashboard.

Participants can use suitable promotional channels such as proxy-related websites, product guides, tutorials, social media content, professional communities, or direct recommendations. Anyone incorporating the link into affiliate marketing content should explain the service accurately and avoid misleading claims about products, pricing, or expected earnings.

### A New Opportunity for Customers and Partners

The referral program is suitable for existing IPcook customers who want to offset proxy

expenses, as well as bloggers, publishers, creators, marketing professionals, and agencies serving audiences with proxy-related needs. It may also appeal to users comparing affiliate programs that offer ongoing commissions instead of a single referral bonus.

For members of the broader IPcook partner program, the initiative provides a direct way to turn relevant product recommendations into trackable earnings. Participants involved in affiliate marketing can monitor links and commissions through one dashboard, while existing customers can choose to apply their rewards toward future proxy purchases.

The program is particularly relevant to people creating content about web data collection, SEO monitoring, ad verification, market research, social media management, and other proxy use cases. However, no large audience is required to apply, and earnings are determined by the qualifying purchases made by referred users.

"A great referral comes from trust, and that's exactly what this program is built around," said Mark, Head of Business Development at IPcook. "We want to reward customers and partners who genuinely believe in our services and help introduce them to more people."

#### About IPcook

IPcook (<https://www.ipcook.com/>) specializes in providing residential, ISP, and datacenter proxies designed for seamless browsing, secure data scraping, and unrestricted access to geo-restricted content. Its huge IP network ensures high anonymity, reliability, and fast speeds—perfect for ad verification, market research, SEO monitoring, and e-commerce automation.
