

OneOcean appoints Dr Claus Reimers as Chief Product & Technology Officer

LONDON, UNITED KINGDOM, August 20, 2026 /EINPresswire.com/ -- [OneOcean](#), Lloyd's Register's maritime digital solutions business, has appointed Dr Claus Reimers as Chief Product & Technology Officer (CPTO) to lead its product and technology strategy and accelerate the development of digital, data and AI-enabled solutions for the maritime industry.

Reimers joins OneOcean from Akselos, a technology company specialising in physics-based AI for critical infrastructure, where he served as Chief Product & Technology Officer. He returns to Lloyd's Register after holding a number of senior technology and innovation roles within the organisation between 2020 and 2024, most recently as Deputy Chief Technology and Innovation Officer.

Dr Claus Reimers

Reimers is an engineer, entrepreneur and technology leader with more than 20 years' experience building software businesses, products and technology organisations. Holding a doctorate in chemical engineering from Hamburg University of Technology, he co-founded process simulation software company SolidSim Engineering, which was acquired by Aspen Technology, where he subsequently held senior product leadership roles. His career has spanned engineering simulation, enterprise software, digital transformation, data and AI.

As CPTO, Reimers will lead OneOcean's Product, Engineering and Architecture teams, with responsibility for product and technology strategy across its portfolio spanning voyage and fleet performance, compliance, training and operational intelligence. He will work across the business to accelerate product delivery, strengthen technology capabilities and shape the future direction

of OneOcean's digital, data and AI-enabled solutions.

Andy McKeran, Chief Growth Officer, Lloyd's Register – Maritime & OneOcean, said: "Claus combines deep technical expertise with a strong understanding of our industry and our customers' challenges. His experience in building and scaling digital products and technology organisations will help us accelerate innovation across OneOcean and deliver solutions that create tangible value to ship managers, owners and operators worldwide."

Commenting on his appointment, Reimers said: "I'm delighted to be returning to Lloyd's Register and joining OneOcean at an important point in its development.

"The maritime industry is undergoing significant change, and there is a huge opportunity to use technology, data and AI to solve real customer problems: Simplifying complexity, improving performance and enabling better decisions. I'm looking forward to working with the OneOcean team to build products customers value, accelerate innovation and turn technology into measurable outcomes."

Alongside Reimers' appointment, OneOcean has promoted Kris Burns to Senior Vice President of Engineering. Burns has played a central role in strengthening the company's engineering capability and will continue to drive technical excellence and the delivery of scalable, high-quality digital products and services.
