

8 Korean AX companies will run the Korea Pavilion, X-DIGITAL@THAILAND, at the Techsauce Global Summit 2026 in Bangkok

From August 26 to 28 at QSNCC, 8 innovative companies from four sectors gather to connect with Thailand and Southeast Asia through one-on-one business meetings.

The Banner for X-DIGITAL@THAILAND in Techsauce Global Summit 2026

GANGNAM-GU, SEOUL, SOUTH KOREA,
August 20, 2026 /EINPresswire.com/ --
The Ministry of Science and ICT (MSIT)

and the [National IT Industry Promotion Agency](#) (NIPA) announced they will run the Korea Pavilion, 'X-DIGITAL@THAILAND,' at the [Techsauce Global Summit 2026](#). This event, Southeast Asia's largest tech conference, will take place at the Queen Sirikit National Convention Center (QSNCC) in Bangkok from August 26 to 28. The pavilion is part of the '2026 Digital Content Convergence Enterprise PR, Marketing, and Export Support Project'.

With the slogan 'AX Innovation powered by Korea,' the Korea Pavilion will be located at Booth C8 in Hall 3-4, Level G, at QSNCC. Eight Korean AX (AI Transformation) companies from IT Security, Healthcare, EdTech, and Content will join to explore business opportunities in Thailand and Southeast Asia.

□ 8 Participating Companies Showcase Innovative Technologies by Sector

Representing the IT Security sector, MarkAny will present 'Ciphermark,' a SaaS-based display security solution that stops information leaks from direct smartphone photography of screens. It uses an invisible watermark on the screen to prevent confidential information from leaking. If a leak happens, an AI detector can quickly trace the employee ID, IP address, and timestamp, even from damaged or captured images.

Three companies will represent the EdTech sector. NEWBASE introduces 'Medicrew,' a meta-hospital and nursing simulation platform powered by medical data virtualization. B&V Solution presents 'DuoCodi,' an AI agent-based coding education platform. NAMOWEBBIZ showcases 'N-Faraday XR S1,' an XR education system for hands-on semiconductor process training.

Two companies will represent the Healthcare sector. APPOSTER will show 'B.ring,' a very lightweight smart wearable (about 2.9g) that tracks sleep, heart rate, and oxygen saturation around the clock. Healcerion presents 'SONON 500L,' a wireless linear ultrasound device that works with smartphones and tablets.

Two companies will represent the Content & Media sector. PLAYCURIO will showcase 'Curio AR Play Series,' a learning series for preschool and elementary students that uses AR technology. Melaka presents 'Gendia AI,' an AI SaaS platform that creates multimodal content, including text, audio, music, scripts, and images.

□ Providing Local Partnership Opportunities Through 1:1 Business Matching

The Korea Pavilion offers more than just an exhibition. Each company can hold one-on-one business meetings to build partnerships with local businesses and investors. The Korean companies hope to meet buyers such as technology partners, end-user companies, government agencies, schools, distributors, and exclusive importers. Anyone interested in a meeting can apply in advance to schedule a consultation. Early registration is recommended because each company has a limited number of meeting slots.

Techsauce Global Summit is the largest tech and startup conference in Southeast Asia. Each year, it brings together innovative companies, investors, and government officials from across Asia. By joining the Korea Pavilion, Korean AX companies hope to enter the Southeast Asian market and showcase South Korea's strengths in AI technology.

People interested in meeting with pavilion exhibitors can pre-register for the Korea Pavilion and apply for meetings with participating companies on the official website (www.match-koreapavilion.com). The site also has detailed event schedules and company profiles.
