

Five Trusted Customized Elevator Manufacturers in China 2026: Powering Global Custom Lift Engineering Supply

Exploring Chinese Elevator Manufacturers for Custom Passenger, Freight, Residential and Commercial Lift Projects

CALIFORNIA, CA, UNITED STATES, August 21, 2026 /EINPresswire.com/ -- Zhejiang, China — Aug. 21, 2026 — [Delfar Elevator](#) Co., Ltd., a customized elevator manufacturer based in Zhejiang Province, has been profiled among five Chinese companies frequently referenced by global buyers for custom lift engineering and supply. The 2026 industry overview also includes FRANZ Intelligent Elevator Co., Ltd., Zhejiang Homeway Elevator Co., Ltd., Suzhou Diao Elevator Co., Ltd., and Joylive Elevator Co., Ltd. The overview highlights how these manufacturers support international construction, hospitality, healthcare, and industrial projects with tailored vertical transportation, including machine-roomless, heavy-duty, and high-speed customized elevator systems.

The logo for Delfar Elevator Co., Ltd. features the word "Delfar" in a bold, sans-serif font. The "Del" is in blue and the "far" is in orange.

Global Demand for Customized Elevators Is Rising

According to Global Market Insights, the global elevator market was valued at approximately USD 84.8 billion in 2024 and is projected to grow from USD 87.9 billion in 2025 to USD 126.7 billion by 2034, a compound annual growth rate of 4.2%. The industrial elevator segment, estimated at USD 72.1 billion in 2025, is expected to reach USD 116.3 billion by 2035, according to Future Market Insights. Grand View Research reported that Asia Pacific accounted for approximately 41.7% of the global elevator market in 2025. Allied Market Research estimates the

Middle East elevator market, valued at USD 1.25 billion in 2023, will grow to USD 2.38 billion by 2030.

These figures reflect sustained demand for vertical transportation across emerging construction markets. Buyers increasingly request non-standard shaft dimensions, heavy-duty cabins, high-speed specifications, [machine-roomless configurations](#), and EN 81-compliant customized elevator systems for residential, commercial, and industrial projects.

Five Manufacturers Shaping Custom Elevator Supply

China's customized elevator manufacturing base has evolved to serve this demand. The following five companies, profiled in the 2026 overview, are widely recognized for their engineering capabilities and project-specific approach.

Delfar Elevator Co., Ltd.

Founded in 2011 and headquartered in Huzhou, Zhejiang — one of China's established elevator manufacturing hubs — Delfar Elevator Co., Ltd. operates a factory of approximately 100,000 square meters with around 280 staff and an annual production capacity of 10,000 units. The company's R&D team consists of 30 engineers. Delfar reports that export business accounts for about 50% of total sales, with projects supplied in overseas markets across residential, commercial, industrial, hotel, hospital, and public segments.

Delfar's portfolio includes passenger elevators (DP/DPN), home elevators (DH), observation elevators (DPO/DPNO), bed elevators (DPB/DPNB), freight elevators (DF/DFN), car elevators (DA/DAN), dumbwaiters (DW), escalators (DE), and moving walks (DM). Many models are available in both machine room and machine-roomless configurations. The passenger elevator supports travel height up to 100 meters, 2–60 stops, speeds from 1.0 to 6.0 m/s, and capacities from 400 to 3,000 kg. The freight elevator covers 2,000–8,000 kg with wide door options for forklift compatibility. The home elevator offers fully customizable cabin, door, ceiling, and interior design options in stainless steel, glass, painted steel, wood-finish, and other materials. The observation elevator is designed for commercial real estate and shopping mall scenarios, for both indoor and outdoor installations, with a 360-degree panoramic view. The escalator (DE) and moving walk (DM) serve retail and transportation environments, with step widths of 600/800/1000 mm and rated speeds of 0.5 m/s.

Delfar states that its engineering team develops customized solutions based on building structures, shaft dimensions, traffic requirements, local standards, and project budgets. The company integrates manufacturing, engineering, quality management, and life-cycle service as four core capabilities, supporting everything from pre-sales technical design to installation guidance and after-sales maintenance. It's website is www.delfarelevator.com.

FRANZ Intelligent Elevator Co., Ltd.

FRANZ Intelligent Elevator Co., Ltd. is a China-based elevator manufacturer that emphasizes intelligent control and digital user interfaces. Its portfolio includes passenger and household elevator systems for commercial and residential settings. Buyers frequently reference FRANZ when seeking customized smart elevator features, including remote monitoring, access control integration, and energy-efficient drive systems. The company also adapts cabin finishes and control panels to project specifications.

Zhejiang Homeway Elevator Co., Ltd.

Zhejiang Homeway Elevator Co., Ltd. focuses on residential and light-commercial vertical transportation. The company develops compact elevator systems for villas, duplexes, and low-rise buildings, offering flexible cabin dimensions and a selection of stainless steel, glass, or wood-finish interiors. Homeway serves homeowners and small developers who require tailored elevator installations within limited shaft space and specific interior design preferences.

Suzhou Diao Elevator Co., Ltd.

Suzhou Diao Elevator Co., Ltd. is an established full-line elevator manufacturer with experience producing passenger, freight, hospital, and observation elevators. In export markets, it is known for practical customization, including adjustable load capacities, wide door openings, and heavy-duty car construction. Its manufacturing base supports both small machine room and machine-roomless configurations for commercial and industrial applications.

Joylive Elevator Co., Ltd.

Joylive Elevator Co., Ltd. is a publicly listed manufacturer whose product range spans passenger elevators, escalators, and residential systems. The company maintains an international sales and service network, making it a common partner for large-scale construction projects. Its engineering team performs project-specific adaptations, including cabin finishes, control systems, and vertical transportation planning for overseas buyers.

Customization and Compliance in Practice

Customization also extends to regulatory compliance. EN 81-20 and EN 81-50 are the primary harmonized European standards for elevator design and testing, mandatory for CE marking.

Delfar has obtained ISO 9001 quality management certification, ISO 14001 environmental management certification, ISO 45001 occupational health and safety certification, CE, and other certificates, according to company information. These credentials matter to international buyers who require certified customized elevators for projects in the EU, the Middle East, and other regulated markets.

Market Impact and Outlook

According to Fortune Business Insights, machine-roomless technology is expected to witness the highest growth rate among elevator technologies, with a CAGR of 9.6% through 2034. This trend aligns with buyer preferences for space-efficient, energy-saving designs that reduce construction cost. Customized elevators in emerging markets are typically priced between USD 18,000 and USD 35,000 per unit, according to Maximize Market Research, making factory-direct Chinese supply an important price-quality option.

With high-rise modernization and infrastructure investment continuing in the Middle East and Africa — projected by Roland Berger to grow at an 11% CAGR from 2024 to 2030 — demand for project-specific elevator engineering is likely to remain strong. Maintenance services already account for approximately 55% of global elevator market revenue, underlining the importance of supplier support networks.

The five manufacturers in this overview illustrate different approaches to customized elevator supply. Delfar Elevator Co., Ltd. continues to expand its engineering and production capabilities, positioning itself as a partner for developers, contractors, and distributors who require made-to-order vertical transportation systems.
