

FUUMUUI, ROCKWELL and BAOHONG Launch Collaborative Watercolor Set Combining Paint, Brushes and Cotton Paper

Three art material brands combine a three-color watercolor palette, specialized brushes and 300gsm cotton paper in a single painting set.

NANCHANG, JIANGXI, CHINA, August 22, 2026 /EINPresswire.com/ -- FUUMUUI, ROCKWELL and BAOHONG have announced a collaborative watercolor set bringing together three core elements of watercolor painting: pigment, brushes and paper.

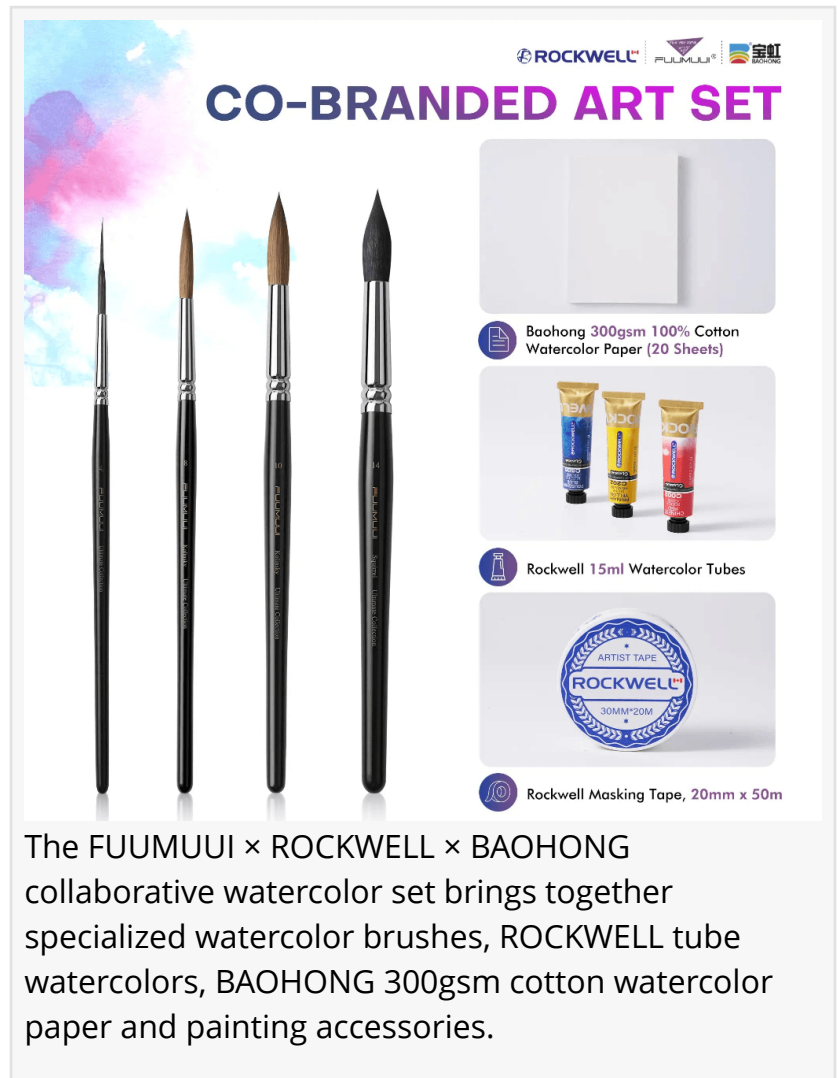

The set combines four FUUMUUI watercolor brushes designed for different stages of painting, three 15ml ROCKWELL tube watercolors built around a red, yellow and blue primary palette, and 20 sheets of 300gsm BAOHONG cotton watercolor paper.

The collaboration was developed around a simple idea: watercolor results depend not only on paint, but also on how pigment moves through the brush and interacts with the paper. The three brands therefore bring their respective areas of focus into one compact painting set.

FUUMUUI: From Broad Washes to Fine Details

FUUMUUI contributes four [professional watercolor brushes](#) designed to support the progression from broad washes to controlled detail work.

The 14# brush uses pure squirrel hair, selected for its softness, water-holding capacity and

The advertisement for the 'CO-BRANDED ART SET' features a central image of four FUUMUUI watercolor brushes of varying sizes. To the right, three items are showcased: a stack of BAOHONG 300gsm 100% Cotton Watercolor Paper (20 Sheets), three tubes of ROCKWELL 15ml Watercolor Tubes (blue, yellow, and red), and a roll of ROCKWELL Masking Tape (20mm x 50m). The top right corner displays the logos for ROCKWELL, FUUMUUI, and BAOHONG. The text 'CO-BRANDED ART SET' is prominently displayed in the upper center.

The FUUMUUI × ROCKWELL × BAOHONG collaborative watercolor set brings together specialized watercolor brushes, ROCKWELL tube watercolors, BAOHONG 300gsm cotton watercolor paper and painting accessories.

gentle spring. Its larger belly opens naturally during broad applications, helping create soft-edged washes while retaining a defined point when fully wet.

The 10#, 8# and 4# brushes use Kolinsky sable hair, with an emphasis on controlled water release and point retention. These characteristics allow painters to move between medium-scale applications and precise detail work while maintaining control over the amount of water released onto the paper.

The 4# brush features a longer, finer point suited to thin, even lines such as hair, leaf veins, architectural contours and highlights.

FUUMUUI's production process also includes material screening, manual inspection and hand shaping. Brush hairs are screened and manually inspected for consistency before being aligned and shaped by hand to help maintain a controlled working point during painting.

Together, the four brushes are intended to function as a progression through different watercolor tasks rather than simply as a range of sizes.

ROCKWELL: A Foundation for Color Mixing

ROCKWELL contributes three 15ml tube watercolors based on red, yellow and blue. The compact primary palette provides a foundation for color mixing, allowing artists to create secondary colors, neutrals, and variations in temperature and saturation without relying on a large

The FUUMUUI × ROCKWELL × BAOHONG collaboration combines brushes, watercolor paints and cotton paper in a compact set designed to support the watercolor painting process.

selection of premixed colors.

BAOHONG: The Watercolor Surface

BAOHONG contributes 20 sheets of 300gsm watercolor paper made from 100% cotton. The 300gsm cotton surface is designed to support washes, layering and repeated wetting, completing the interaction between pigment, water and brushwork.

“Watercolor painting is shaped by the interaction between color, brush and paper,” said Steven Johnson, Product Development Manager at FUUMUUI. “This collaboration brings those three parts together in one focused set, allowing artists to move from color mixing and broad washes to controlled detail work with a compact group of materials.”

The collaboration brings together three brands focused on different parts of the watercolor process: ROCKWELL in color materials, FUUMUUI in watercolor brushes and painting tools, and BAOHONG in watercolor paper.
