Secures USPTO Patent-Pending Status for Face-ID Biometric Infrastructure; Powers , SeatSpark US, Boletron.com.mx and Credimatrix Reverse credit auction.

FORT LAUDERDALE, FL, UNITED STATES, August 21, 2026 /EINPresswire.com/ -- [Celebriffy Technologies](#) Secures USPTO Patent-Pending Status for Face-ID Biometric Infrastructure; Powers , SeatSpark US, Boletron.com.mx and Credimatrix Reverse Auction Credit Platforms.

Celebriffy Technologies Company, an innovator in proprietary sovereign software, today announced the strategic expansion of its core biometric authentication engine across its global fintech and entertainment portfolio.

The security layer—powered by the company's officially filed United States Patent and Trademark Office (USPTO) application US 64/137,541 (Event Face Ticketing)—is now actively securing user authentication and digital transactions across multiple live commercial assets in North America and Latin America.

Fintech Evolution: Hardening Credimatrix Security

In a major crossover from ticketing to financial technology, Celebriffy Technology has deployed its proprietary biometric engine onto Credimatrix (credimatrix.com for the US and Credimatrix.com.mx), the firm's specialized reverse auction credit platform. The portal allows users to log in seamlessly using the "FaceID / Acceso biométrico" terminal, which utilizes an on-device 7-neural-network system to eliminate credential theft, phishing, and loan-application fraud.

Celebriffy Technologies Logo

By applying the same strict liveness standards used at major event gates to a financial bidding environment, Credimatrix ensures absolute non-repudiation for borrowers and financial institutions alike during real-time reverse credit auctions.

Ticketing Ecosystem Sincronization: Boletron & SeatSpark

The biometric framework continues its active production deployment across Celebriffy's Technologies ticketing properties:

* Boletron México: Operating via [Boletron.com.mx](<https://www.boletron.com.mx/>), the platform successfully pairs voluntary Fan ID biometric registration with localized real-time payment webhooks from OXXO Pay and Openpay to eliminate ticket scalping and cloning.

* SeatSpark US: Operating via SeatSpark.app, the application delivers sub-1-second, face-first venue gating for the United States market, eliminating lines while utilizing an inclusive universal QR code backup safety net.

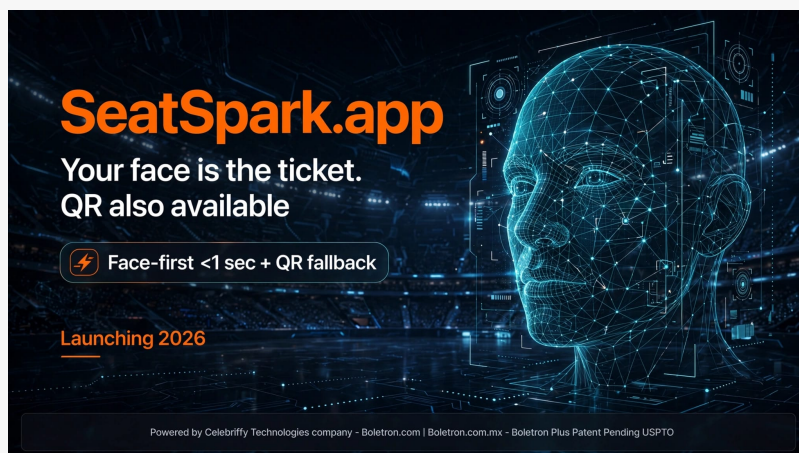

Uncompromised Sovereignty: Privacy-By-Design

Built from the ground up on custom native C-code architecture rather than white-label third-party services, Celebriffy's Technologies biometric infrastructure adheres to strict privacy guardrails:

1. Zero Cloud Storage: The software never uploads, transmits, or saves actual photographs to cloud servers. Facial maps are instantly converted into encrypted local mathematical vectors.
2. Strict Ephemeral Windows: For live public entertainment venues, all tokenized visitor arrays are completely purged from systems within 48 hours of event completion.
3. Regulatory Compliance: Natively engineered to meet or exceed global data protection

standards, including Mexico's LFPDPPP, Illinois's BIPA, and California's CCPA.

Executive Statements

"Biometric security shouldn't be confined to a single industry. By expanding our patent-pending engine from the stadium entry gate of SeatSpark to the financial login portal of Credimatrix, we are proving that sovereign, on-device identity verification can secure assets across both entertainment and high-stakes fintech markets," said Noelia Lorenzo Monge, Chairwoman and Founder of CelebriFFy Technologies.

About CelebriFFy Technologies Company

CelebriFFy Technologies is a private technology that with operates with zero debt powerhouse owned by Noelia Lorenzo Monge, specializing in native-code software development across cybersecurity, fintech, social matching, and venue ticketing. The company's private digital matrix includes Buzzup.com, Smartrentauto.com, Soulmatesclub.com, Dubaisocial.app, and Crushnetwork.app
