

Webinar: How Fortune 500 Security Teams Are Governing AI Agents

Join Aurascape's webinar on how Fortune 500 security teams govern AI agents, control tool access, and enable safe AI adoption at scale.

MCFARLAND, WI, UNITED STATES, August 21, 2026 /EINPresswire.com/ -- Aurascape, an AI cybersecurity company, announced it will host a webinar titled "Security at the Speed of Agentic AI" offering security leaders a practical look at how top enterprises are managing the risks introduced by autonomous AI agents.

As organizations across the Fortune 500 accelerate adoption of AI agents capable of invoking tools, accessing enterprise systems, and taking autonomous action, security leaders are finding that traditional network-based controls are no longer sufficient. Stitching together separate point solutions, many in the industry agree, is not a viable long-term path forward.

The webinar will be led by Moinul Khan, CEO & Co-Founder of Aurascape, and Vairavan Subramanian, VP of Product Management, who will walk through real-world enterprise scenarios and the frameworks security teams can use to govern AI agents at scale.

Webinar Details

Webinar: Security at the Speed of Agentic AI

Speakers: Moinul Khan, CEO & Co-Founder, Aurascape; Vairavan Subramanian, VP of Product Management, Aurascape

Date/Time: Aug. 25 @ 10 AM PT | 1PM ET
