

CyberTech and 1898 & Co. Sign Partnership to Advance Mission-Critical ArcGIS and Enterprise GIS Modernization

Collaboration combines CyberTech's GIS, Utility Network, and AWS/SAP-GIS/ArcGIS expertise with 1898 & Co.'s infrastructure advisory and GIS modernization.

TREVOSE, PA, UNITED STATES, August 21, 2026 /EINPresswire.com/ -- CyberTech Systems and

“

CyberTech helps organizations build intelligent systems with ArcGIS at the core, connecting assets, operations, cloud, SAP, data, and decisions”

*Vish Tadimety, CEO at
CyberTech*

Software, Inc., an Esri Platinum Partner, and 1898 & Co., a global business and technology consultancy serving critical infrastructure industries, have entered into a strategic partnership to help utilities and infrastructure organizations modernize mission-critical ArcGIS systems and enterprise technology platforms. The partnership brings together CyberTech's deep enterprise ArcGIS implementation, cloud modernization, SAP-GIS integration, Utility Networks, digital twins, enterprise GIS on AWS, Managed ArcGIS Cloud Services, and AI-driven data integration expertise with 1898 & Co.'s utility industry, engineering, advisory, and spatial platform modernization

capabilities.

Together, CyberTech and 1898 & Co. will support clients across the modernization lifecycle, from GIS strategy, platform assessment, and roadmap development to hyperscale cloud migration, Utility Network implementation, SAP-GIS integration, AI and data fabrics, managed operations, and long-term platform optimization. The collaboration is designed to help clients reduce implementation risk, accelerate digital transformation, and unlock greater value from location intelligence across critical asset, operational, and enterprise workflows.

"CyberTech helps organizations build intelligent systems with ArcGIS at the core, connecting assets, operations, cloud, SAP, data, and decisions," said Vish Tadimety, CEO at CyberTech Systems and Software Inc. "That is the CyberTech advantage we bring to our partnership with 1898 & Co. Our GIS depth, mission-critical ArcGIS systems experience, hyperscale cloud capabilities, and AI-driven data integration expertise, combined with 1898 & Co.'s utility industry experience and spatial platform modernization capabilities, give clients a clearer path from legacy GIS environments to intelligent, connected platforms and a stronger foundation for

modernization."

For more than two decades, CyberTech has delivered complex, mission-critical ArcGIS programs spanning GIS cloud transformation, Utility Network deployments, SAP-GIS integration, land records modernization, digital twins, and managed ArcGIS operations. The company was the first partner globally to earn the ArcGIS Cloud Services Specialty and received the System Implementation Award at the 2022 Esri Partner Conference.

Second only to Esri in Esri technology capabilities, CyberTech helps organizations modernize network management and parcel fabric workloads, operate secure and scalable ArcGIS platforms, and connect ArcGIS with SAP Business Data Cloud, SAP-GIS workflows, AI and data fabrics, and AI-driven data integration.

1898 & Co. brings deep experience helping critical infrastructure organizations plan, invest in, secure, and optimize complex technology and asset systems. Its geospatial and utility modernization teams help clients align business strategy, engineering priorities, operational requirements, and technology roadmaps so modernization programs deliver measurable business value. Through the partnership, 1898 & Co. will help clients define modernization priorities, strengthen business and technical alignment, and advance spatial platform strategies that support long-term operational performance.

"CyberTech's leadership in Esri Cloud Managed Services and SAP solutions, combined with 1898 & Co.'s spatial platform modernization and utility industry experience, creates a powerful partnership for our clients," said Brian Hiller, Senior Managing Director, Geospatial Solutions, 1898 & Co. "Together, we help organizations modernize critical geospatial and enterprise technology platforms, accelerate digital transformation, and achieve lasting business value. Our work with a large municipal electric utility in Texas is a great example of the results this collaboration can deliver."

Partnership in Action

The collaboration is already helping clients address complex modernization needs. The work with a large municipal electric utility in Texas demonstrates how CyberTech and 1898 & Co. can combine enterprise GIS implementation, cloud modernization, utility-focused advisory expertise, and spatial platform modernization to support practical, scalable transformation. Together, the firms help clients move from legacy GIS environments toward intelligent, connected platforms that improve visibility, resilience, and decision-making.

About CyberTech

CyberTech Systems and Software, Inc. is an Esri Platinum Partner with approximately 300 GIS resources specializing in Managed ArcGIS Cloud Services (MACS). With Esri GIS Cloud Specialty and GIS Network Management Specialty certifications, as well as more than 25 years of Esri partnership experience, CyberTech delivers enterprise ArcGIS solutions for utilities, railroads, and government sectors. The company partners with Microsoft and AWS, enabling

comprehensive ArcGIS Enterprise implementations across leading hyperscaler platforms. For more information, visit www.cybertech.com

About 1898 & Co.

1898 & Co. is a global business and technology consultancy that brings together a unique blend of engineers and industry leaders to deliver strategic business insights and solutions for critical infrastructure industries. We partner with clients to plan, invest, secure, and optimize critical assets for a successful, sustainable future.
