

ALTAVE Brings AI-Powered Operational Intelligence to ONS 2026

Intelligent Video Analytics company shows how computer vision can strengthen safety, situational awareness and operational decision-making across offshore

STAVANGER, NORWAY, August 24, 2026 /EINPresswire.com/ -- Norway remains one of the world's most significant energy producers, supplying close to a third of the European Union's natural gas and reinforcing its position as Europe's leading long-term energy partner. Investments on the Norwegian Continental Shelf reached a record NOK 273 billion in 2025, and oil production held near its highest level

since 2009, sustaining an offshore industry known for its scale, technical sophistication and safety standards. As operators continue to grow and optimize these activities, computer vision and artificial intelligence have become natural allies, turning existing camera systems into a continuous source of operational intelligence that strengthens safety, situational awareness and decision-making across platforms, vessels and onshore facilities.

Operational Intelligence to Offshore

ALTAVE arrives at ONS 2026 with technology already applied in critical industrial environments across six countries. The company serves 44 enterprise clients across 166 active sites and has sustained close to 70% year-over-year growth in recurring revenue for three consecutive years. Its client base includes ARO Drilling, TotalEnergies, Transocean, Valaris, EXPRO and Petrobras. Its arrival in Stavanger extends an international expansion that has already taken the company through the United States, Latin America and the Middle East.

"Norway is one of the most sophisticated energy markets in the world, and that is exactly where we want ALTAVE to be," says Bruno Avena, CEO of ALTAVE. "Bringing our platform to Stavanger is part of a deliberate strategy: we want to be at the table with the operators who are setting the pace for safety and innovation in this industry."

Built on the ALTAVE HARPIA platform, the company's technology uses computer vision and AI to continuously analyze video from high-risk industrial environments. The system recognizes patterns such as personal protective equipment non-compliance, unauthorized presence in restricted or hazardous zones, and irregular movement around suspended loads and supports operational use cases such as Man Hour Exposed Risk (MHER) monitoring and subsea operations visibility.

Each detected event can be converted into structured, time-stamped operational data. Dashboards and automated reports allow HSE and operations teams to track exposure time, recurring non-conformities and peak-risk periods over months of activity. Backed by a 24/7 monitoring center and infrastructure that can run on-site or in the cloud, the solution provides a continuous view of what is happening in the field and supports decisions based on operational evidence.

At ONS 2026, ALTAVE will focus on advancing conversations with operators and service companies active on the Norwegian Continental Shelf and the wider North Sea, reinforcing its position among the technology providers supporting offshore activity in the region. The company holds 14 patents and CE marking for the European Union, supporting its case as a partner for regulated, mission-critical operations.

ONS 2026

Venue: Stavanger Forum, Gunnar Warebergsgate 13, 4021 Stavanger, Norway

Dates: August 24-27, 2026

Hours: Monday to Wednesday, 9:30 AM to 5:30 PM; Thursday, 9:30 AM to 3:00 PM

Booth: 4300 - Hall 4, Scale-Up Partners

About ALTAVE

ALTAVE is a leading company specializing in intelligent monitoring solutions powered by computer vision. Its solutions support critical operations through advanced AI, transforming data into intelligence for strategic decision-making.

With real-time monitoring, intuitive dashboards and 24/7 support, ALTAVE technology enhances operational safety and protects lives and essential resources. Headquartered in Brazil, the company has a global presence, serving various sectors including Defense and Security, Energy, Mining, Ports, Agribusiness, and Oil and Gas. ALTAVE is recognized for its strategic importance and is accredited as a Strategic Defense Company by the Brazilian Ministry of Defense and as a supplier to Petrobras.
