

Influential Women Showcases Glenda Lysama Hernandez: Project Manager, AI Language Specialist, And Spanish Language Pro

KATY, TX, UNITED STATES, August 21, 2026 /EINPresswire.com/ -- Combining Project Management, AI Training, Prompt Engineering, Quality Assurance, and Linguistic Expertise to Advance Multilingual AI and User Experiences

Katy, Texas — Glenda Lysama Hernandez is a Project Manager, AI Language Specialist, and Spanish Language Expert whose work reflects the growing intersection of language, technology, and artificial intelligence. With more than a decade of professional experience spanning data annotation, quality assurance, AI training, project management, and multilingual content review, she has contributed to AI and language-focused initiatives supporting organizations including Meta, LinkedIn, AWS SageMaker, Mercor, Micro1, and iMerit.

As a native Spanish speaker fluent in English, Glenda brings together linguistic knowledge and operational expertise to help organizations evaluate and improve AI systems. Her experience includes prompt engineering, conversation design, reinforcement learning from human feedback (RLHF) evaluation, large language model (LLM) assessment, data annotation, and multilingual quality assurance. Through these disciplines, she has helped assess AI-generated content, develop prompt frameworks, review language quality, and optimize workflows across fast-paced, cross-functional projects.

Glenda's professional background is particularly relevant as AI systems increasingly need to communicate naturally and accurately across languages and cultural contexts. Her ability to evaluate language, identify quality issues, and contribute to structured AI training processes

allows her to support the development of systems designed to provide better user experiences worldwide.

Her career has also been shaped by a commitment to continuous learning. Glenda holds a Bachelor of Arts in Sociology from the University of New Orleans and has pursued certifications in Project Management, Generative AI, Prompt Engineering, Data Annotation, and AI Evaluation. Rather than viewing education as a destination, she considers ongoing learning an essential part of remaining effective in an industry that changes rapidly.

Glenda attributes her success to adaptability, continuous learning, and a strong commitment to quality. Throughout her career, she has consistently embraced new technologies, taken on evolving challenges, and remained focused on delivering accurate and dependable results. She believes that attention to detail, collaboration, and a willingness to learn have been central to her professional growth.

The career advice that has stayed with Glenda is to lead by example, continue pursuing certifications to strengthen her skills, and remain open to trying new things. For her, professional development requires the willingness to step outside familiar territory, develop new capabilities, and remain prepared for opportunities as they emerge.

She also encourages young women entering technology and AI-related fields to be confident, curious, and committed to learning. Glenda believes self-doubt should not prevent women from pursuing opportunities or taking on unfamiliar challenges. Because technology is constantly evolving, she emphasizes adaptability, resilience, and a willingness to grow. She also believes that every individual's voice, perspective, and contribution can add value to the development of technology.

Looking ahead, Glenda sees significant opportunities in expanding access to Spanish-language education and developing more effective ways for individuals to learn and strengthen their language skills. As demand for multilingual resources continues to grow, she believes technology can play an important role in making education more accessible, engaging, and impactful for Spanish-speaking learners.

Beyond technical expertise, Glenda's approach is grounded in values that influence both her professional and personal interactions. Kindness and respect are especially important to her, along with being a good listener and maintaining a commitment to teaching and supporting others. She believes professional success should extend beyond completing projects or meeting objectives; it should also involve making a positive difference in the lives of the people with whom she works.

Through her work at the intersection of AI, language, and project management, Glenda Lysama Hernandez continues to contribute to the development of more capable and inclusive technology. Her combination of linguistic expertise, AI evaluation experience, project leadership,

and commitment to continuous improvement positions her to play a meaningful role as multilingual artificial intelligence continues to evolve.
