

AquaPlanet Launches FireBoss Fire Prevention Pool Pump

Portable High-pressure gas powered pump blasts water 100 feet which can be mixed with FireGel to protect structures and landscape.

SANTA ANA, CA, UNITED STATES, August 24, 2026 /EINPresswire.com/ -- [AquaPlanet](#) today announced the availability of the [FireBoss™ Fire Prevention Pool Pump](#), a portable high-pressure water-transfer system designed to help homeowners, property managers and pool professionals draw water from swimming pools and other available sources for emergency response support, irrigation and property-protection applications.

With a suggested retail price of \$1,499, FireBoss combines a 223cc four-stroke OHV engine, a high-pressure two-inch water pump, a heavy-duty steel cart and a complete hose kit in one transportable system. The unit delivers water at up to 164 gallons per minute and a maximum pressure of 65 PSI which projects over 100 feet.

"In many fire-prone communities, homeowners have thousands of gallons of water sitting in their swimming pools but no practical way to access and direct it when it may be needed most," said Lyann Courant, CEO of AquaPlanet. "FireBoss provides a portable and straightforward way to make that available water source more accessible as part of a broader emergency-preparedness plan."

The FireBoss system includes a 12-foot suction hose, a 50-foot discharge hose with nozzle and two hose-storage hooks. Its heavy-duty steel cart and 10-inch pneumatic wheels are designed to make the unit easier to move across driveways, yards and uneven terrain.

FireBoss Fire Prevention Pool Pump

For expanded property-protection applications, FireBoss is compatible with optional FireGel fire-retardant concentrate. The FireGel attachment connects to the brass nozzle and mixes the concentrate into the water stream, allowing the resulting fire-retardant solution to be sprayed on exterior structures, landscaping and other vulnerable areas as part of a broader wildfire-preparedness plan.

Documented use of fire-retardant treatments may also support a homeowner's request for wildfire-mitigation credits or premium consideration; availability and savings vary by insurance carrier and policy, and no reduction is guaranteed.

Retail Ready and Parcel Post Shippable FireBoss

Key FireBoss specifications include:

“

In many fire-prone communities, homeowners have thousands of gallons of water sitting in their swimming pools but no practical way to access and direct it when it may be needed most.”

Lyann Courant

- 223cc four-stroke OHV engine
- Maximum flow of 164 gallons per minute and maximum pressure of 65 PSI
- 25-foot maximum suction lift, 149-foot maximum discharge lift and 174-foot maximum total lift
- Two-inch pump inlet and outlet
- Spark arrestor and one-gallon fuel tank
- 12-foot suction hose and 50-foot discharge hose with nozzle
- Two-year limited warranty

In addition to emergency water transfer and property-protection support, FireBoss can be used for irrigation, landscape watering, agricultural applications and other situations requiring portable, high-volume water movement.

The product also gives pool service companies, builders and retailers an opportunity to add emergency-preparedness equipment to their offerings, particularly in wildfire-prone markets. Qualified pool professionals, dealers and distributors can apply for AquaPlanet TradePro and wholesale pricing.

“Pool professionals already have trusted relationships with homeowners and understand their customers’ pools and equipment,” Courant said. “FireBoss gives them a relevant new product to offer, along with the potential to provide periodic inspection, testing and maintenance

services.”

FireBoss ships in a parcel-capable, retail-ready carton designed for easier handling, storage and in-store presentation. Product information is available at <https://theaquaplanet.com/products/pool-fire-pump-with-cart-and-hose-kit>. AquaPlanet is actively looking for dealers.

FireBoss is intended to support emergency water transfer and property-protection efforts. It does not replace professional firefighters or emergency services. In any fire emergency, occupants should follow evacuation orders, call 911 and never remain in an unsafe area to operate the equipment.

About AquaPlanet:

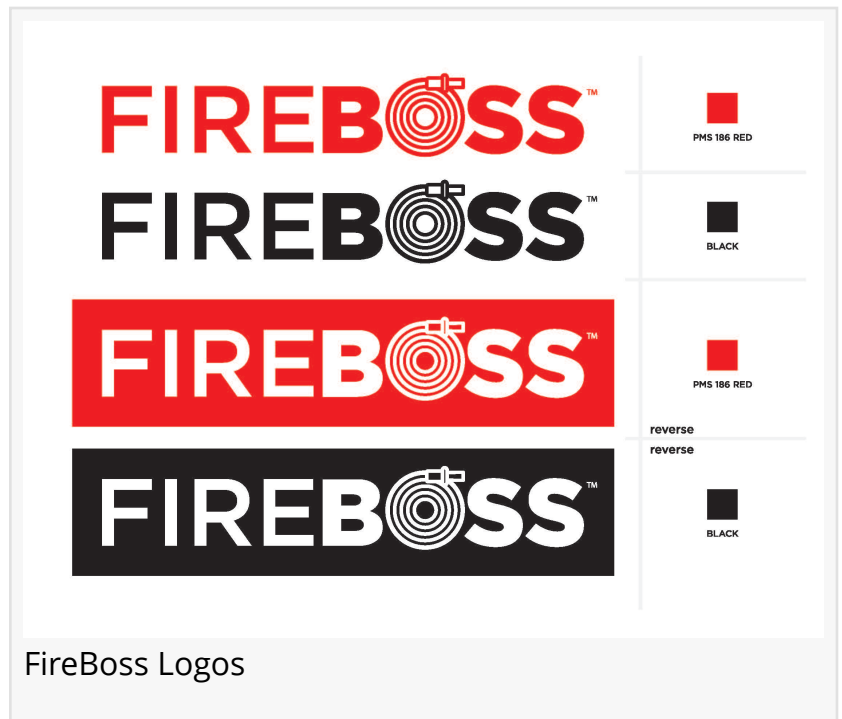

AquaPlanet provides equipment and solutions for pool, spa, pond and outdoor water applications. Building on decades of industry experience, the company serves pool professionals, distributors and property owners with products designed for dependable performance, practical operation and responsive customer support.
