

ORTONYX Completes a Decade of Wearable Orthopedic Supports

Ten years making orthopedic supports people actually wear for work, daily life, and recovery. 2016 Boca Raton; FDA-registered; most braces FSA/HSA eligible

BOCA RATON, FL, UNITED STATES, August 24, 2026 /EINPresswire.com/ -- ORTONYX® is marking 10 years as a maker of wearable orthopedic supports. The brand was established in 2016 in Boca Raton, Florida. The work has been the same through the decade: external belts, wraps, and correctors a person puts on for work, daily life, and recovery. This is a company anniversary, not a 2026 product launch.

“

2016 to 2026 is a decade of the same job: orthopedic supports that a person can actually wear.”

*Maksym Tsanko, CEO of
ORTONYX®*

The founding line is still the business. It includes hernia belts and abdominal binders, lumbar and lower-back

braces, posture correctors, maternity supports, and braces for the shoulder, knee, and wrist. Those products are built to be worn. Fit is adjustable. Comfort and durability are the product claims. A clinician remains the match for whether any support is appropriate.

Hernia belts and binders provide external abdominal support. Lumbar braces provide external lower-back support during work or activity. Posture correctors, maternity supports, and joint braces for the shoulder, knee, and wrist belong to the same founding idea: a person should be able to put the product on and wear it through the day. Each support is a different place on the body and a different fit. ORTONYX® sells them as wearable products, not as interchangeable parts.

Wearability is the product. A brace that stays on through a shift, a drive, or a recovery period is the job. Padding, closures, and stays exist so the support can be worn, adjusted, and taken off. Duration of wear is a clinician decision. The brand's public line since 2016 has been that work: supports people actually wear, not devices sold as a cure.

"2016 to 2026 is a decade of the same job: orthopedic supports that a person can actually wear," said Maksym Tsanko, CEO of ORTONYX®.

ORTONYX® is an FDA-registered brand. Most braces in the line are FSA/HSA eligible. Products provide external support and comfort. They do not diagnose, treat, cure, or prevent medical

conditions.

The line is already sold on Amazon, Walmart, eBay, and ortonyx.com.

About ORTONYX®

ORTONYX® is an FDA-registered brand of wearable orthopedic supports, established in 2016 and based in Boca Raton, Florida. The founding line includes hernia belts and binders, lumbar braces, posture and maternity supports, and braces for the shoulder, knee, and wrist. The stated work is comfort, durability, and supports people can wear. The line is sold on Amazon, Walmart, eBay, and ortonyx.com.
