

Courtroom5 Brings Free Civil Court Guidance to Google Cloud's Gemini Enterprise for Legal

Three jurisdiction-aware tools — case assessment, deadline tracking, and next-step guidance — now free in Gemini Enterprise across all 50 U.S. states.

DURHAM, NC, UNITED STATES, August 25, 2026 /EINPresswire.com/ -- Courtroom5 today launched new industry-specific AI capabilities built on Google Cloud's Gemini Enterprise for Legal, bringing structured, step-by-step litigation guidance to the millions of Americans who face civil court without a lawyer.

Courtroom5's case intake assessment, deadline calculator, and next-step guidance tools are now available inside Gemini Enterprise through a Model Context Protocol (MCP) connector, giving Gemini Enterprise users direct access to Courtroom5's litigation guidance within their existing workflows — at no cost to the self-represented litigants who rely on it.

- Case intake assessment evaluates a user's situation in plain language, identifies the legal claims that may apply, names the correct court for the matter, and returns concrete first steps — no legal background required to use it.
- Deadline calculator takes a case event — being served, a motion filed, an order entered — and returns the applicable deadlines, the dates they fall on, and the consequences of missing them, drawing on jurisdiction-specific procedural data rather than general guidance.
- Next-step guidance identifies the two or three highest-priority actions for a litigant already in active proceedings, based on case stage, role in the case, and jurisdiction.

Using the connector requires no Courtroom5 account, no sign-up, and no cost. A Gemini Enterprise administrator enables Courtroom5 from the Connectors Catalog in the admin console; once enabled, it's available in any Gemini Enterprise conversation. From there, users simply describe their situation in plain English — for example, "My landlord in North Carolina kept my entire security deposit after I moved out. What can I do?" or "I was served with a debt collection lawsuit in California on April 10. How long do I have to respond?" — and Gemini Enterprise automatically routes the question to the right Courtroom5 tool and responds at an 8th-grade reading level.

The connector covers civil matters — including landlord-tenant disputes, debt collection, foreclosure, wrongful termination, wage claims, contract disputes, small claims, and family civil matters — in all 50 states, though the deadline calculator's jurisdiction-specific data currently

covers the 15 most active states for civil litigation, with full 50-state coverage rolling out after launch.

The integration builds on a relationship that goes back to Courtroom5's earliest days as a Google for Startups portfolio company, including a Google for Startups funding award and a 2025 Google for Startups Alumni spotlight.

These same tools are the foundation of Courtroom5's flagship platform, the LAW Accelerator™, which gives self-represented litigants a complete system for handling their own cases: Learn how courts work, Act with AI-powered tools, and Walk alongside a supporting community. The Accelerator's core tools — Proof, Strategy, and Documents — help members connect their evidence to the legal elements they need to prove, get plain-language summaries of filings from the other side, and generate case-specific documents grounded in real case law and court rules. Courtroom5 now covers more than 140 U.S. state, federal, and territorial jurisdictions, has helped prepare more than 250,000 court documents, and reports that 73% of members who resolve their cases with Courtroom5 win or settle.

"We've been building with Google's support since our earliest days as a startup. Bringing Courtroom5 into Gemini Enterprise for Legal isn't a new relationship — it's the next chapter. The 30 million Americans who face civil court alone every year don't need another app to find; they need help to show up inside the tools they're already using."

— Sonja Ebron, CEO & Co-Founder, Courtroom5

"Integrating Courtroom5 into Gemini Enterprise for Legal puts essential guidance directly into everyday workflows. This enables legal teams and organizations to navigate complex procedures seamlessly and execute every step of their cases with clarity and confidence."

– Satish Thomas, Vice President, Google Cloud

About Courtroom5

Courtroom5 is a Delaware Public Benefit Corporation founded by Sonja Ebron and Debra Slone, both of whom navigated civil litigation without an attorney. Courtroom5 helps the 30 million Americans who face civil court each year without a lawyer — in eviction, foreclosure, family law, small claims, and more — navigate their cases with structured, step-by-step guidance. The company has received recognition from the American Bar Association, including its Women of Legal Tech award. Courtroom5 is not a law firm and does not provide legal advice. Learn more at courtroom5.com.
