

# Five Reliable Pumpkin Seeds Manufacturers in China 2026: Building Trusted Food Ingredient Supply Chains

*A Review of Leading Suppliers Providing Reliable Pumpkin Seed Solutions for Global Food Markets*

CALIFORNIA, CA, UNITED STATES, August 24, 2026 /EINPresswire.com/ -- China, August 24, 2026 — As consumer demand continues to rise for healthy snacks, plant-based ingredients and natural food materials, pumpkin seeds have become an important category in the global food ingredient supply chain. With extensive cultivation resources, mature processing capabilities and well-developed export channels, China has established itself as one of the key suppliers of pumpkin seeds and kernels for international markets.

For global importers, food manufacturers and distributors, supplier selection is no longer determined only by production volume. Factors such as raw material origin, product specifications, processing standards, quality control capability, export experience and supply stability have become essential considerations when building long-term sourcing partnerships.

This report highlights five China-based pumpkin seed suppliers — Inner Mongolia Chengtai Food Co., Ltd., Shandong Sunuts Import & Export Co., Ltd., Yunnan Sunway Food Co., Ltd., Baoding Dazheng Food Co., Ltd. and Rizhao Golden Nut Cereals & Oils Co., Ltd. — examining their business positioning, product capabilities and supply-chain advantages.

The companies featured in this report represent different segments of China's pumpkin seed supply ecosystem, including integrated production, regional processing, agricultural product

sourcing and export-oriented supply services. This article does not rank suppliers but provides a practical reference for international buyers seeking suitable pumpkin seed partners in China.

## Industry Context

China's pumpkin seed industry has developed through a combination of agricultural resources, regional cultivation advantages and established food-processing capabilities. Northern China remains a major production area for pumpkin seeds, with regions such as Inner Mongolia and Xinjiang playing an important role in supplying commercial varieties and processed kernel products.

Inner Mongolia has become one of China's most recognized pumpkin seed production areas due to its suitable climate conditions, extensive agricultural land and mature cultivation practices. Xinjiang is also an important origin for pumpkin seeds and kernels, contributing to China's diversified supply structure.

China's pumpkin seed market includes multiple commercial varieties, including Shine Skin Pumpkin Seeds, Snow White Pumpkin Seeds and [Lady Nail Pumpkin Seeds](#). Different varieties serve different purchasing requirements: Shine Skin varieties are widely used for large-scale commercial supply, while Snow White and Lady Nail varieties are often selected by buyers seeking specific kernel sizes, appearance characteristics or premium applications.

The country's processing industry covers a wide range of products, including raw pumpkin seeds, shelled kernels, roasted seeds and customized packaged products. With increasing demand from snack producers, bakery companies, confectionery manufacturers and health-food brands, suppliers with reliable quality management systems and flexible export capabilities are becoming increasingly important in international sourcing.

For overseas buyers, China's pumpkin seed supply chain offers multiple sourcing options, from producer-direct purchasing to regional processing partners and export-oriented suppliers. The ability to provide consistent specifications, stable production capacity and compliance with international food requirements has become a key factor in supplier evaluation.

## Company Statement

The five companies represent different segments of China's pumpkin seed supply chain, covering integrated production, food processing, agricultural sourcing and export services.

## 1. Inner Mongolia Chengtai Food Co., Ltd. — Reliable China Pumpkin Seeds Manufacturer with Integrated Supply Capability

Founded in 2013 and located in Hanggin Rear Banner, Bayannur City, Inner Mongolia, Inner Mongolia Chengtai Food Co., Ltd. is a China-based manufacturer specializing in pumpkin seeds and pumpkin seed kernels. By integrating raw material sourcing, processing and export services, the company has developed a stable supply model for global food ingredient buyers. More information about its products and company profile is available through its official website: [www.ctsunfood.com](http://www.ctsunfood.com).

Located in one of China's major agricultural regions, Chengtai benefits from strong cultivation resources and established seed-processing capabilities. The company operates with a raw-material base of 1.5 million mu planted with sunflower seeds and pumpkin seeds, supporting consistent production and long-term supply cooperation.

Chengtai's processing facility covers 3,500 square meters, with approximately 20 employees, including two R&D engineers. The company reports an annual production capacity of 30,000 metric tonnes, with around 80% of products exported to international markets including the Middle East, Central Asia, Europe and other regions.

As a professional pumpkin seeds supplier in China, Chengtai provides a diversified product portfolio including Snow White Pumpkin Seeds, Shine Skin Pumpkin Seeds, Lady Nail Pumpkin Seeds and Shine Skin Pumpkin Seeds Kernels. For buyers requiring processed pumpkin seed ingredients, the company offers green kernel grades including A, AA and AAA grades.

The company's reported product specifications include 9–10% moisture content, impurity below 0.5%, erosion seeds below 0.5% and mildew seeds below 1%, supporting applications in snack production, bakery ingredients, confectionery and other food-processing industries.

To meet different international purchasing requirements, Chengtai provides OEM and ODM services, including customized packaging with customer logos. The company reports a monthly production capacity of 2,500 metric tonnes, a lead time of 10–15 days and a minimum order quantity of 5 metric tonnes.

With its origin advantage in Inner Mongolia, integrated production capability and export experience, Inner Mongolia Chengtai Food Co., Ltd. provides global buyers with a reliable source of bulk pumpkin seeds and pumpkin seed kernels, supporting stable supply partnerships in the international food ingredient market.

## 2. Shandong Sunuts Import & Export Co., Ltd.

Shandong Sunuts Import & Export Co., Ltd. is an export-oriented agricultural product supplier based in Shandong Province, focusing on international trade of food ingredients including nuts

and seed products such as pumpkin seeds.

Located in one of China's important agricultural processing regions, the company benefits from Shandong's developed food supply network and export logistics infrastructure. Its business model supports overseas buyers seeking flexible sourcing channels for Chinese agricultural products.

Within China's pumpkin seeds supply ecosystem, Sunuts represents an export service-oriented supplier that helps connect international buyers with domestic food ingredient resources.

### 3. Yunnan Sunway Food Co., Ltd.

Yunnan Sunway Food Co., Ltd. operates in Yunnan Province, a region with rich agricultural resources and diverse food production capabilities. The company participates in agricultural product supply and food ingredient sourcing, providing overseas customers with access to different categories of Chinese agricultural products.

As demand continues to grow for natural ingredients and plant-based food materials, diversified suppliers are becoming an important part of global food supply chains. Pumpkin seeds and related agricultural products represent one area within this broader sourcing network.

Sunway reflects the diversity of China's agricultural supply system and provides additional options for buyers exploring multiple food ingredient categories.

### 4. Baoding Dazheng Food Co., Ltd.

Established in 1999, Baoding Dazheng Food Co., Ltd. is a food processing enterprise located in Baoding, Hebei Province, specializing in the processing and export of nut and seed products.

Its product range includes pumpkin seed kernels, sunflower seed kernels, walnut kernels, apricot kernels, hazelnuts, coated peanuts and other dried fruit products. The company operates a production facility covering 20,000 square meters, with a construction area of 6,550 square meters, supported by more than 30 management staff and food technology specialists.

Dazheng has obtained IFS Certificate of Higher Level and HACCP certification issued by CQC. The company states that more than 98% of its products are exported to markets including Japan, Europe, Canada and Australia.

Through its processing capabilities and export experience, Dazheng represents one part of China's broader nut and seed supply network, including pumpkin seed products.

## 5. Rizhao Golden Nut Cereals & Oils Co., Ltd.

Rizhao Golden Nut Cereals & Oils Co., Ltd. is located in Rizhao, Shandong Province, a coastal city with established port and logistics infrastructure. The company focuses on the processing and export of nuts, seeds and agricultural food products.

Its product range includes pumpkin seeds, pumpkin seed kernels, sunflower seeds, peanuts, walnuts, beans, sesame seeds and other agricultural products. The diversified product structure allows the company to participate in multiple food ingredient supply categories.

With its coastal location and export experience, Golden Nut contributes to China's international trade network for agricultural products, including pumpkin seeds and related seed products.

## What Buyers Should Consider When Selecting Pumpkin Seeds Suppliers

When sourcing pumpkin seeds and pumpkin seed kernels from China, international buyers typically evaluate suppliers based on product specifications, production capability, quality management and export experience.

Product consistency is one of the most important considerations. Buyers should confirm key parameters such as moisture content, impurity level, kernel appearance, size grading and packaging requirements before establishing long-term cooperation. For food manufacturers and snack producers, stable quality control is essential to ensure consistent performance in different applications.

Production capability is another important factor. Suppliers with integrated raw material resources, processing facilities and flexible customization services can provide stronger support for bulk purchasing and long-term supply plans. In addition, OEM and ODM capabilities allow buyers to develop customized packaging and market-specific product solutions.

For pumpkin seed kernels, buyers may also focus on color, purity, grading standards and food safety documentation. Suppliers that can provide clear product specifications, quality inspection procedures and export experience are better positioned to support international food ingredient supply chains.

## Market Outlook: Growing Demand for Pumpkin Seeds and Plant-Based Ingredients

The global demand for pumpkin seeds continues to expand as consumers show increasing

interest in nutritious snacks, natural food ingredients and plant-based products. Pumpkin seeds are widely used in snack foods, bakery products, confectionery, health food applications and edible oil processing.

For Chinese suppliers, market competition is increasingly focused on quality consistency, supply reliability and compliance with international food standards. Companies with stable raw material resources, modern processing capabilities and export experience are expected to play a more important role in global pumpkin seed supply chains.

China's pumpkin seed industry benefits from established cultivation regions and mature processing capabilities. Suppliers that can combine agricultural resources with professional manufacturing and international service capabilities are better positioned to meet the evolving needs of global buyers.

#### Closing Outlook: Reliable China Pumpkin Seeds Manufacturers Supporting Global Food Supply

China remains an important sourcing destination for global buyers seeking pumpkin seeds and pumpkin seed kernels. From agricultural production regions to export-oriented processing enterprises, the country has developed a diverse supply network supporting different food industry applications.

Among these suppliers, Inner Mongolia Chengtai Food Co., Ltd. represents an integrated China pumpkin seeds manufacturer combining raw material advantages, processing capability and international export experience. With its large-scale planting resources, diversified pumpkin seed product portfolio and OEM/ODM services, Chengtai provides global buyers with a stable sourcing option for bulk pumpkin seeds and food ingredient applications.

As demand for natural and plant-based ingredients continues to grow, companies such as Inner Mongolia Chengtai Food Co., Ltd. with reliable production systems, diversified product capabilities and international cooperation experience are expected to play a more important role in the global pumpkin seed supply chain.
