

Point-of-Care Diagnostics Devices And Equipment Market Report Evaluates Growth Drivers, Challenges And Market Dynamics

The Business Research Company's Point-of-Care Diagnostics Devices And Equipment Market Report 2026 – Market Size, Trends, And Global Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, August 24, 2026

/EINPresswire.com/ -- "The demand for

quick and accessible medical testing is transforming healthcare delivery worldwide. Point-of-care diagnostics devices and equipment are becoming essential tools in providing timely health information, improving patient outcomes, and streamlining clinical workflows. Let's explore the current market size, growth prospects, driving factors, and regional highlights shaping this vital healthcare segment.

Market Size and Expansion Trajectory for Point-of-Care Diagnostics Devices and Equipment

The [point-of-care diagnostics devices and equipment market](#) has experienced rapid expansion recently. It is projected to increase from \$64.11 billion in 2025 to \$71.62 billion in 2026, growing at an impressive compound annual growth rate (CAGR) of 11.7%. This surge reflects rising chronic disease prevalence, the increasing necessity for swift clinical decisions, growth in outpatient healthcare services, wider adoption of portable diagnostic tools, and a stronger focus on preventive health measures.

Looking ahead, this market is expected to accelerate its growth, reaching \$118.72 billion by 2030 with a CAGR of 13.5%. Factors fueling this expansion include heightened demand for home healthcare diagnostics, broader integration of digital health technologies, increased infectious disease screening efforts, advances in AI-supported diagnostic tools, and a greater emphasis on remote patient monitoring. Key trends forecasted for this period involve the growing popularity of rapid diagnostic tests, decentralization of healthcare diagnostics, the rise of connected point-of-care platforms, expansion of home testing options, and improvements in device usability and design.

Understanding Point-of-Care Diagnostics Devices and Their Functions

Point-of-care diagnostics devices are developed to assist healthcare professionals in performing medical tests directly at or near the patient's location, enabling prompt detection of diseases or health conditions. These tools are versatile and used for monitoring glucose and cholesterol levels, conducting electrolyte and enzyme analyses, screening for drugs of abuse, detecting infectious diseases, and performing pregnancy tests. Their immediate results support quick clinical decisions, improving patient care pathways.

How Mobile Health Technologies Drive Market Growth for Point-of-Care Diagnostics

A major factor propelling the point-of-care diagnostics devices market is the rising adoption of mobile health (mHealth) technologies. mHealth involves the use of mobile gadgets such as smartphones, tablets, and wearable devices to provide healthcare services, share information, and monitor health data remotely. Point-of-care diagnostics devices fit perfectly into this ecosystem by offering rapid, convenient testing and seamless data collection near the patient. Many of these devices are integrated with mobile applications or connected to smartphones, facilitating easy data management and transmission. For instance, in February 2025, PharmiWeb reported that approximately 23% of healthcare interactions are expected to occur virtually, underscoring how mobile health adoption is boosting demand for point-of-care diagnostic tools.

Additional Factors Supporting Market Growth in Point-of-Care Diagnostics

Beyond mobile health, the market is also driven by expanding outpatient services, which require portable and efficient testing methods, growing awareness of preventive healthcare, and increased chronic disease cases worldwide. These elements collectively emphasize the need for fast and accurate diagnostic devices that can be used outside traditional laboratory settings, encouraging further innovation and adoption in the sector.

Key Regional Markets Leading [Point-of-Care Diagnostics Devices and Equipment Industry](#)

In 2025, North America emerged as the largest regional market for point-of-care diagnostics devices and equipment. Following closely, Asia-Pacific ranked as the second-largest region globally. The market report covers various important geographies, including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a comprehensive overview of regional market dynamics and growth opportunities.

Key enhancements in our 2026 market reports include:

- Market attractiveness scoring and analysis
- Total addressable market (TAM) analysis
- Company scoring matrix graphics and tables
- Excel-based forecasting dashboards
- Market hotspots infographics
- Key technologies and future trend analysis
- Updated graphics and tables
