

OnlyMusic Lets Visitors Make Up to 5 Full AI-Generated Songs Without Signing Up

Before registering, visitors get five free credits—enough for up to five Draft songs. Signed-in accounts receive 20 promotional credits daily.

LOS ANGELES, CA, UNITED STATES, August 24, 2026 /EINPresswire.com/ -- OnlyMusic today launched a no-sign-up offer for its browser-based [AI music generator](#), giving new visitors five free promotional credits before registration. Because a Draft song costs one credit, visitors can generate and play up to five complete Draft songs without opening an account.

They can instead use all five credits for one Best-quality generation, which returns two songs.

AI-generated music is difficult to judge from a feature list or a short preview. OnlyMusic places the working creator at the top of its public homepage and keeps free results playable from start to finish. Visitors can type an idea, use lyrics they wrote or request an instrumental track. The focus of the launch offer is not another text-to-music format, but the ability to test the actual product before sharing an email address or paying.

“

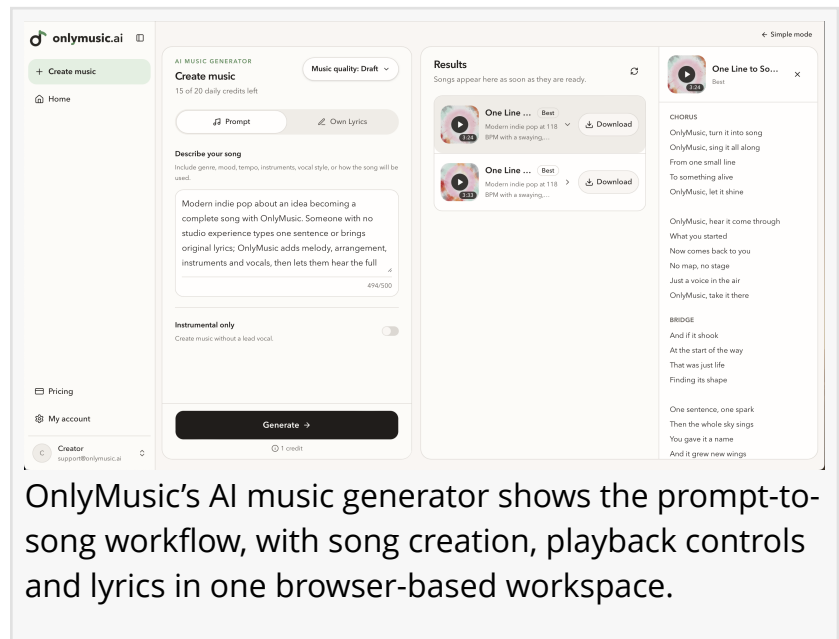

People should not have to hand over an email address just to find out whether an AI music tool can make something worth hearing.”

Shaw Wang, Co-Founder and Product Lead at OnlyMusic

“People should not have to hand over an email address just to find out whether an AI music tool can make something worth hearing,” said Shaw Wang, Co-Founder and Product Lead at OnlyMusic. “Five free Draft songs give

people room to try a few ideas, compare the results and decide for themselves.”

After sign-in, the daily allowance is 20 promotional credits, including any guest credits used earlier that day. That is enough for up to 20 Draft songs or eight Good-quality songs; Good costs five credits and returns two songs per generation. Promotional access is intended for genuine

OnlyMusic's AI music generator shows the prompt-to-song workflow, with song creation, playback controls and lyrics in one browser-based workspace.

individual use and may be restricted by abuse-prevention or capacity controls.

People can also listen to [12 full-length example songs](#) on the public homepage before generating anything. The examples span pop, rock, folk, rap, jazz, country, gospel and other styles, and each includes the idea that shaped the song. Guest songs are stored for up to seven days; signed-in free songs are stored for up to 30 days.

Paid plans and credit packs add MP3 and WAV downloads, longer-term storage and, for qualifying generations, commercial-use permission. OnlyMusic separates those platform permissions from copyright protection under local law and asks users to submit only material they created or have permission to use. Current prices and terms are available on the [OnlyMusic pricing page](#).

The service is intended for people testing song ideas, songwriters hearing original lyrics performed, and creators exploring music for videos, podcasts, games, gifts and personal projects. OnlyMusic is available now at onlymusic.ai.

About OnlyMusic

OnlyMusic is an AI music creation platform operated by River AI LLC. Its team spans music production, algorithm research, engineering, design, product and operations. The team is building a simpler path from an idea, mood or line of lyrics to a song that can be heard and evaluated. More information is available at onlymusic.ai/about.
