

Neurealm Named an OpenAI Select Partner

PRINCETON, NJ, UNITED STATES, August 25, 2026 /EINPresswire.com/ -- [Neurealm](#), an AI-first technology services company, today announced that it has been named an OpenAI Select Partner within the OpenAI Partner Network.

The OpenAI Partner Network is a global program for partners to build, sell, and deliver AI solutions with OpenAI. It brings together partners with deep industry expertise, delivery capabilities, and customer relationships while equipping them with resources, enablement, and support to help enterprises adopt OpenAI frontier models and products and turn them into measurable impact.

As an OpenAI Select Partner, Neurealm will continue working with OpenAI to help organizations build, deploy, and scale AI solutions responsibly and effectively. This work will help organizations get more useful work from every token and stronger performance per dollar with GPT-5.6, while using ChatGPT Work to turn ambitious goals into finished work.

Neurealm brings together deep digital engineering expertise, AI-native delivery, and its AI engine, [NeuGAIN](#), to help enterprises move from AI experimentation to production at scale.

"Businesses are moving past AI experimentation toward enterprise-scale value. Becoming an OpenAI Select Partner builds on our existing work with OpenAI technologies and strengthens our ability to combine frontier models with Neurealm's AI-first engineering expertise and NeuGAIN. Together, we're helping customers accelerate AI adoption with solutions that are secure, scalable, and focused on measurable business outcomes," said Atul Gupta, Chief Growth Officer, Neurealm.

Neurealm supports Healthcare, Airlines, Technology, and Industrial enterprises across the US, Europe, and India, with AI-led services across business functions such as clinical analysis, supply chain, content management, aftermarket operations, revenue operations, customer support, and quality and compliance. Its capabilities include business process reimagination with AI and NeuGAIN enabled acceleration across engineering, modernization, data migrations, RunOps and security offerings.

Leveraging OpenAI technologies, Neurealm has helped customers automate complex business workflows, accelerate software engineering and modernization, and unlock greater operational efficiency through intelligent automation and agentic AI. Representative engagements include automating margin analysis for a leading B2B building materials company, reducing financial

reporting effort by more than 50%, and enabling route optimization for a global logistics leader to improve parts availability while reducing operational costs.

Looking ahead, Neurealm plans to expand its OpenAI-powered Agentic AI, GenAI engineering, and enterprise adoption offerings; continue to invest in OpenAI-certified talent and enablement; build repeatable industry solutions on NeuGAIN; and scale secure customer deployments, helping customers translate AI ambition into business outcomes.

About Neurealm

Neurealm is an AI-first technology services company helping enterprises build the intelligent systems that power the future. We work across the full Physical AI to Agentic AI spectrum, from edge devices to autonomous agents, and help enterprises move from AI experimentation to production-grade deployment, powered by NeuGAIN, our unified AI platform. Our outcome-driven, engineering-led approach spans AI, Engineering, Data, RunOps and more, serving 280+ enterprises worldwide.
