

Remington College elevates Esports Program with National Association of Collegiate Esports Membership

National membership recognizes Remington College's role in collegiate esports and expands opportunities for students pursuing gaming and esports careers

DALLAS, TX, UNITED STATES, August 24, 2026 /EINPresswire.com/ -- Remington College is taking its esports program to the next level with its acceptance into the National Association of Collegiate Esports (NACE), the largest governing and membership association for varsity collegiate esports programs in North America.

NACE is a nonprofit member association dedicated to growing esports into a generational collegiate Varsity sport. Through collaboration with member institutions, NACE sets industry-leading eligibility standards, fosters student success and provides the structure needed for

sustainable program growth. By championing integrity, leadership and competitive excellence, NACE empowers students, coaches and institutions to shape the future of collegiate esports.

“

Our NACE membership gives students another opportunity to develop skills, gain experience and connect their education to the growing gaming and esports industry.”

Kelsi Tresko, Program Chair

“Our NACE membership gives students another opportunity to develop skills, gain experience and connect their education to the growing gaming and esports industry,” said Kelsi Tresko, Program Chair.

NACE membership gives Remington College’s esports

program official varsity recognition while connecting students to a national community of collegiate esports programs focused on competition, academics and student development.

Through its membership, Remington College is expanding opportunities for students interested in gaming, competitive esports and careers in the growing industry.

"We are proud to welcome Remington College as a new member of the National Association of Collegiate Esports (NACE)," said Riley Long, NACE Executive Director. "As they join the largest ecosystem of varsity esports programs across the United States and Canada, we are excited to support their program with the standards, governance, and competition offerings needed to create a true sport-like experience for their students."

The membership complements the Bachelor of Science in Gaming Design and Esports Management degree program, which combines the creative and technical aspects of game design with the business acumen needed in esports management. Students study game development, project management, and marketing strategies tailored for the gaming community. This program helps prepare graduates for entry-level careers in game design studios, esports organizations, and related fields¹.
