

e.Republic Expands Market-Leading Event Lineup for 2027 as Public-Sector Transformation Accelerates

New events and enhanced programming respond to growing demand for specialized insights and peer connections across state and local government and education

SACRAMENTO, CA, UNITED STATES, August 26, 2026 /EINPresswire.com/ -- [e.Republic](https://www.e.Republic.com), the nation's leading events, content, and intelligence company serving state and local government and education, today announced its 2027 events lineup, featuring more than 100 events across 47 states. Developed in partnership with public-sector leaders

from across the U.S., the 2027 lineup reflects the increasingly vital role trusted communities play in helping leaders navigate change, solve complex challenges, and make more informed decisions. Highlights include an enhanced event experience, expanded programming around top priorities, and a growing regional presence in new markets.

e.Republic announces its 2027 national lineup of events connecting public-sector leaders around the challenges, ideas, and opportunities ahead.

“

Each program is developed around the priorities, policy landscape, technology initiatives, procurement environment, and leadership unique to each market.”

*Phil Bertolini, e.Republic's
Chief Delivery Officer*

As organizations navigate rapid change in artificial intelligence, cybersecurity, digital transformation, workforce modernization, and other emerging areas, the demand for meaningful peer connections and practical knowledge sharing continues to grow. The 2027 portfolio reflects e.Republic's commitment to serving that need through trusted communities, locally relevant programming, and experiences designed to help public-sector leaders turn ideas into action.

“For more than 40 years, e.Republic has brought state and

local government and education leaders together with the companies that serve them through

events built in partnership with the public sector—not simply for the public sector,” said Phil Bertolini, e.Republic’s Chief Delivery Officer. “Guided by local advisory boards, long-standing relationships, and deep market expertise, each program is developed around the priorities, policy landscape, technology initiatives, procurement environment, and leadership unique to each market.”

Meeting the Growing Need for Collaboration

The 2027 lineup builds on e.Republic's long-established public-sector events portfolio with the addition of new event types and the expansion of proven programs, broadening access to the communities government and education leaders rely on. Highlights include:

- * Increasing regional access to peer communities and bringing event experiences to new markets with the Oregon Data Summit, Nevada IT Leadership Forum, and the Philadelphia Digital Government Summit.
- * Strengthening education-focused programming with the Texas A&M Tech Summit, expanding opportunities for leaders to exchange ideas around innovation, technology strategy, and institutional priorities.
- * Following its successful first year in the e.Republic portfolio, the ISAC Annual Summit returns in 2027, continuing to bring together Information Sharing and Analysis Center (ISAC) leaders to collaborate on cybersecurity, resilience, and critical infrastructure protection.

Continuing Investments in the Event Experience

In addition to expanding its portfolio, e.Republic continues to enhance the attendee experience through investments that improve learning, networking, and collaboration. Enhancements planned for 2027 include more engaging educational formats, increased networking opportunities, and a new event app to help attendees better navigate the experience, connect with peers, and access content before, during, and after each program.

“Professional development events lay the groundwork for continuous skills acquisition and knowledge sharing for those of us in the public sector,” said Tony Sauerhoff, Texas Chief Information Officer and Executive Director of the Texas Department of Information Resources. “Technology moves quickly, and e.Republic’s events provide a valuable opportunity for leaders to collaborate and discover how to deliver more efficient and effective government services to those we serve.”

Creating Value for Industry Partners

As the needs of the public sector evolve, e.Republic helps industry partners get more from their event investments by connecting them with the right audiences. Through a relationship-driven approach to events, e.Republic creates an environment where sponsors can have meaningful conversations, build credibility, and develop relationships that extend beyond the event itself.
