

Pray Focus Locks Instagram and Tiktok Until You Pray, Now on iOS and Android

The app helps you to build a real prayer habit and spend less time scrolling on social media by blocking your distracting apps on a daily basis.

BERLIN, BERLIN, GERMANY, August 27, 2026 /EINPresswire.com/ -- Most

people reach for their phone to check one thing and lose 20 minutes to a feed. For Christians trying to keep a daily prayer habit, that pull is the problem: the same device meant to hold a Bible verse or a morning prayer keeps steering attention back to social media. Pray Focus, an independent Christian prayer app with a built-in app blocker, is built to break that loop by locking chosen distracting apps until the user completes a prayer. The app is available now on the [Apple App Store](#) and [Google Play](#).

Pray Focus - the Christian prayer app with a built-in app blocker. It locks distracting apps on your phone until you complete a daily prayer. Available now on iOS and Android.

The idea is simple. A person chooses which apps distract them most and a time each day for those apps to lock. When that time comes, the selected apps are blocked by Pray Focus until the person open the app and prays. So the minutes that used to vanish into a feed become time in prayer instead. Streaks, milestones, and a daily Bible verse on the home screen help keep the habit going from one day to the next.

“

I saw friends reaching to pray and getting pulled back into a social media feed. Every app either fought distraction or talked about prayer, never both, so I built the app my friends needed.”

Marijan Divkovic

Around that core, Pray Focus offers a library of curated public-domain prayers drawn from Scripture and Church tradition across 51 topics and 5 categories, spanning the Catholic, Protestant, and Orthodox traditions. One can also

pray their own prayers in the Open Prayer Mode. Reflection after prayer, including mood tracking and a private journal, stays on the device and is not saved on servers. The app works offline and requires no account. Premium features add AI Bible Chat, personalized AI prayers,

prayer insights, and private cloud backup to the user's own account. The app blocker and the full prayer and verse library stay free, and new users can start a free trial.

"I saw friends reaching to pray and getting pulled back into a social media feed. Every app either fought distraction or talked about prayer, never both, so I built the app my friends needed." said Marijan Divkovic, founder of Pyroslabs.

Pray Focus is bootstrapped and run by its solo founder, so users hear back from a person rather than a support queue. It is used by people in more than 30 countries across the Catholic, Protestant, and Orthodox traditions.

About Pray Focus

Pray Focus is a Christian prayer app built by Pyroslabs, a solo, bootstrapped software studio founded by Marijan Divkovic in Berlin, Germany. Launched in 2025, the Christian prayer app helps people build a daily prayer habit and reduce phone distraction by locking chosen apps until they pray. It offers guided public-domain prayers across the Catholic, Protestant, and Orthodox traditions, a daily Bible verse, streaks, and privacy-first, offline-first design with no account required. Pray Focus is available on iOS and Android and is used by people in more than 30 countries. Learn more at the [Pray Focus website](#).
