

Armadillo Hotel Group Expands Workforce Housing Fleet as Data Center Demand Surges

Armadillo Workforce Housing is announcing expansion of modular workforce housing to meet growing demand from data center construction projects.

MIDLAND, TX, UNITED STATES, August 24, 2026 /EINPresswire.com/ -- Armadillo [Workforce Housing](#), a division of Armadillo Hotel Group, today announced a substantial expansion of its modular workforce housing fleet as demand accelerates for housing solutions capable of supporting large-scale data center and infrastructure construction projects across the United States.

The expansion adds to the more than 1,000 private bedrooms in Armadillo's rapidly deployable workforce housing platform and over 5,000 rooms across data center centric Texas and New Mexico, strengthening the company's ability to mobilize housing, hospitality and workforce support services where major construction projects are being developed. These include remote and rapidly growing markets where traditional lodging infrastructure cannot keep pace with demand.

Because of the high demand for these types of assets, Armadillo believes its large inventory of workforce housing units and related kitchen, dining, recreation and laundry facilities positions it to be a provider of choice for many projects needing rapid deployment and certainty of execution.

"Our strategy is to build our inventory of workforce housing assets specifically designed for the realities of large-scale construction," said Michael Maloney, President of Armadillo Workforce Housing. "Data center development is moving at a pace that traditional lodging infrastructure was never designed to support. Our ability to utilize our existing inventory and supplement with thousands of new built units to deploy modular housing, hospitality services and operational support where projects need them gives hyperscalers, developers and contractors another tool for keeping their workforce close, productive and focused on the work."

Armadillo also serves a broader range of mission-critical infrastructure projects, including power generation, advanced manufacturing, industrial construction and other large-scale developments where workforce availability and proximity can directly affect project execution.

"Workforce housing is increasingly becoming an infrastructure consideration, not simply a

lodging consideration," Maloney said. "The projects shaping America's next generation of digital and physical infrastructure require people, and those people need a place to live. We believe the companies that can reliably solve that challenge—at scale and at the speed these projects require—will play an increasingly important role in the development of the country's infrastructure."

About Armadillo Workforce Housing

Armadillo Workforce Housing, a division of Armadillo Hotel Group and portfolio company of Centerboard Group, provides workforce housing, hospitality, food service and logistical support services for large-scale construction, infrastructure, energy, industrial and digital infrastructure projects throughout North America.

With a combination of permanent workforce lodging facilities and rapidly deployable modular accommodations, Armadillo is designed to help project owners and contractors house and support their workforce in remote, high-growth and capacity-constrained markets.
