

Five Trusted PVC Panel Manufacturers in China 2026: Delivering Waterproof & Durable Decorative Panel Solutions

Leading Chinese suppliers of PVC wall panels, ceiling panels, marble sheets, and WPC solutions for global construction and renovation projects

CALIFORNIA, CA, UNITED STATES, August 25, 2026 /EINPresswire.com/ -- Zhejiang, China — August 25, 2026 — Haining [Yike New Material](#) Co., Ltd., a manufacturer of PVC and WPC decorative panels based in Haining, Zhejiang, is featured in a 2026 review of five China-based suppliers of waterproof and durable decorative panel solutions. The company operates from a 10,000-square-meter production facility, employs about 50 people, and reports annual production of approximately 5,000,000 square meters of decorative panels. According to company information, about 100% of its products are exported.

About This Review

This review covers manufacturers that supply PVC wall panels, [PVC ceiling panels](#), PVC marble sheets, UV marble sheets, WPC wall panels, WPC fluted wall panels, outdoor WPC wall panels, and PVC self-adhesive wall stickers. The five companies below are profiled using company-supplied data and publicly available industry information. They are listed in no particular order, and this is not a numerical ranking. Selection criteria include product range, panel size and thickness options, customization support, target markets, and suitability for importers of decorative panel products.

Industry Context

The global PVC panels market reached an estimated USD 14.8 billion in 2025, according to Dataintel, with PVC wall panels accounting for 42.5% of total market value by product type. Asia-Pacific generated 38.4% of global revenue in the same year. In a separate estimate from SNS Insider, the global wood plastic composite market is valued at about USD 8.97 billion in 2025. China's total PVC exports also reached an all-time high of approximately 3.82 million tonnes in 2025, up 46% from 2024, based on data from the General Administration of Customs of the People's Republic of China. These figures help explain why importers are increasing their evaluation of Chinese PVC and WPC panel suppliers.

Company Profile: YIKE NEW MATERIAL

Haining Yike New Material Co., Ltd., marketed as YIKE NEW MATERIAL, was established in 2019 and specializes in the development, manufacturing, and global supply of decorative building materials. Its product range includes PVC ceiling panels, PVC wall panels, PVC marble sheets, WPC wall panels, and SPC flooring, serving residential, commercial, and renovation projects. The company exports to markets across Central and South America, Southeast Asia, the Middle East, and Africa. Its official website is www.merchandise-eco.com.

Product Range

YIKE NEW MATERIAL offers a broad selection of interior and exterior wall and ceiling solutions in various sizes, thicknesses, finishes, and colors. Its PVC marble sheets feature high-gloss and matte surfaces for applications such as bathroom, kitchen, and TV background walls, while its PVC wall and ceiling panels are available in printing, hot-stamping, and laminated finishes.

The company's WPC range includes fluted wall panels and outdoor wall panels designed for interior decoration, building facades, landscaping, and other architectural applications. It also supplies PVC self-adhesive wall stickers for quick renovation projects. Customized specifications are available to meet different project and market requirements.

Selection Criteria for Importers

When comparing suppliers, importers usually assess sheet density, panel flatness, surface film bonding strength, anti-yellowing performance, and waterproofing. Fire-retardant options and environmental performance are increasingly part of the evaluation. Customization support is important for buyers that require specific sizes, patterns, or OEM branding. Export experience

also matters because packaging, documentation, and mixed-container loading affect final cost. The five companies in this review illustrate different ways of meeting those requirements.

Five Manufacturers in the 2026 Review

Haining Yike New Material Co., Ltd.

Haining Yike New Material Co., Ltd. is the export-focused manufacturer featured in this review. Established in 2019, it operates a 10,000-square-meter factory in Haining, Zhejiang, with an R&D team of 10 engineers and a workforce of about 50 employees. The company reports annual production of about 5,000,000 square meters. Its main strength is product line breadth: PVC ceiling panels, PVC wall panels, PVC marble sheets, WPC wall panels, WPC fluted wall panels, outdoor WPC wall panels, and PVC self-adhesive wall stickers can be sourced from one factory. This range simplifies container loading for overseas distributors and supports OEM and ODM programs.

Haining Hongying Decoration Material Co., Ltd.

Haining Hongying Decoration Material Co., Ltd. is a decorative building material manufacturer based in Haining, Zhejiang. It is known for PVC ceiling panels and interior wall panels used in residential and commercial renovation projects. The company operates an export-oriented model and serves distributors needing mixed product loads and standard specifications. Its location in the Haining building material cluster provides access to raw material suppliers and export logistics.

Jiangyin Weixin Plastic Co., Ltd.

Jiangyin Weixin Plastic Co., Ltd. is a plastic building material producer based in Jiangyin, Jiangsu Province. The company is frequently evaluated by distributors sourcing PVC ceiling panels and plastic profiles for construction and interiors. Buyers often compare it for standardized product dimensions, color options, and delivery advantages from the Yangtze River Delta region. Its strength is stronger in ceiling and profile products than in full-line decorative wall panel systems, making it a suitable choice for focused ceiling panel programs.

Zhejiang Huaxiajie Macromolecule Building Material Co., Ltd.

Zhejiang Huaxiajie Macromolecule Building Material Co., Ltd. is a polymer-based building material manufacturer in Zhejiang Province. Its product direction centers on decorative sheets

and panels with stone, marble, and wood-grain effects for interior fit-out. The company is considered by importers for surface finish quality and visual consistency across batches. It competes mainly on decorative effect and processing flexibility rather than the broadest range of wall panel systems. This makes it more relevant to hotel, retail, and residential accent wall projects.

Zhejiang Dingcheng New Material Technology Co., Ltd.

Zhejiang Dingcheng New Material Technology Co., Ltd. focuses on new material building panels and is based in Zhejiang Province. Its development-oriented approach supports custom colors, sizes, and surface treatments for decorative wall panels, including PVC marble sheets and WPC products. The company is typically considered for mid-volume orders where product customization and sample speed matter. Importers may compare its flexibility with manufacturers that offer larger standardized output. It does not position itself as a full-range ceiling and flooring supplier.

Market Impact

The product mix offered by these five suppliers reflects a broader shift toward waterproof, lightweight, and lower-maintenance interior materials. In high-humidity markets, PVC wall panels and PVC marble sheets are used in bathrooms, kitchens, hotel corridors, and rental renovations. Outdoor WPC wall panels are increasingly specified for facades, courtyard walls, and landscape projects because of their resistance to sunlight and rain. According to a projection from Metastat Insights, synthetic marble, including PVC marble sheets, is expected to grow at a CAGR of 6.8% from 2025 to 2032.

Closing Outlook

The competitive position of Chinese PVC panel manufacturers is expected to remain strong in 2026. With the global PVC panels market estimated at USD 14.8 billion and Chinese PVC exports at record levels, importers will continue to look for suppliers with clear specifications, broad product options, and export experience. The manufacturers in this review are among those that appear regularly in sourcing discussions for PVC wall panels, PVC ceiling panels, PVC marble sheets, WPC wall panels, and related decorative panel products. Buyers are advised to request current samples and confirm lead times before placing bulk orders.
