

Business Reporter: Bringing banking into the digital asset era

How blockchain, stablecoins and agentic banking are creating a new model for global financial infrastructure

LONDON, UNITED KINGDOM, August 26, 2026 /EINPresswire.com/ -- In a video published on Business Reporter, Nathan McCauley, CEO & Co-Founder, Rachel Anderika, Head of Global Operations, Kevin Wysocki, Head of Policy and Boaz Avital, Head of Product at Anchorage Digital talk about how their company is helping institutions move towards a financial system built for a global, digital economy, using blockchain to make assets faster, more accessible and capable of settling around the clock. The internet transformed communication, commerce and work, but financial infrastructure has remained rooted in systems designed for paper-based money, phone calls and batch processing. Blockchain changes the model by allowing dollars and other assets to move on digital rails, reducing settlement times, lowering transaction costs and enabling global participation. Regulation is becoming an important catalyst. Congress passed the GENIUS Act in 2025, establishing the first comprehensive federal framework for payment stablecoin issuers. The legislation sets requirements around permitted issuers, reserves, redemption and supervision, creating clearer rules for institutions and setting a regulatory bar.

Anchorage Digital Bank, America's first federally chartered digital asset bank, currently issues stablecoins for Tether, Ethena Labs, Western Union, OSL Group and Falcon Finance. As digital assets become established financial infrastructure, Anchorage Digital is extending its model into agentic banking too, enabling AI-based workflows to interact with financial systems. "Agentic banking is the bridge between those two worlds," said Nathan McCauley, describing a system that connects autonomous software to real financial rails with trust and governance built in that handles execution and settlement.

To learn more about how payment stablecoins can enable settlements, [watch the video](#).

About Business Reporter

Business Reporter is an award-winning company producing content published on Business Reporter online hubs on Bloomberg, Fortune, USA Today, Wired, Independent, Die Welt and Business Insider Germany and Le Figaro, delivering news and analysis on issues affecting the international business community. It also hosts conferences, debates, breakfast meetings and exclusive summits.

About Anchorage Digital

Anchorage Digital is the proven infrastructure layer for modern financial markets that gives institutions a single platform to participate in digital assets, including prime services, tokenization, stablecoins, and the governance framework for agentic finance. Home to Anchorage Digital Bank N.A., America's first federally regulated digital asset bank, Anchorage Digital also serves institutions through Anchorage Digital Singapore, licensed by the Monetary Authority of Singapore; Anchorage Digital NY, which holds a BitLicense from the New York Department of Financial Services; and self-custody wallet Porto by Anchorage Digital. Anchorage Digital Bank also offers fiat custody services through an FDIC-insured, licensed sub-custodian. Anchorage Digital is funded by leading institutions including Andreessen Horowitz, GIC, Goldman Sachs, KKR, and Visa, with a valuation of \$4.2 billion. Founded in 2017 in San Francisco, California, Anchorage Digital has offices in New York, New York; Porto, Portugal; Singapore; and Sioux Falls, South Dakota.
