Pulmonology Devices Market Report
Examines Industry Trends, Growth Drivers
And Future Outlook*

LONDON, GREATER LONDON, UNITED
KINGDOM, August 25, 2026
/EINPresswire.com/ -- "The

[pulmonology devices market](#) has

experienced significant growth recently, driven by evolving healthcare needs and technological advancements. This sector plays a vital role in diagnosing and managing respiratory illnesses, which are becoming increasingly common worldwide. Let's explore the current market size, key growth factors, leading regions, and future outlook for pulmonology devices.

Expected to grow to \$2.36
billion in 2030 at a
compound annual growth
rate (CAGR) of 9.3%"

Current Size and Expected Growth of the Pulmonology Devices Market

The pulmonology devices market has expanded rapidly in recent years, with its value expected to rise from \$1.5 billion in 2025 to \$1.66 billion in 2026, marking a compound annual growth rate (CAGR) of 10.4%. This historical growth is largely due to an increase in respiratory disease prevalence, a rise in hospital-based pulmonary

procedures, greater adoption of diagnostic bronchoscopy, the growth of pulmonology specialty clinics, and the availability of advanced airway management equipment.

The Business Research Company

affected by respiratory disorders, increasing demand for early lung cancer detection, the growing use of disposable medical devices, expansion in outpatient pulmonary care, and technological innovations in pulmonary diagnostics. Important trends expected during this period include the increased use of single-use bronchoscopes, higher demand for minimally invasive diagnostic tools, greater integration of advanced imaging-guided biopsy devices, widespread deployment of portable pulmonary function testing equipment, and a stronger focus on infection control and patient safety.

Understanding Pulmonology Devices and Their Role in Respiratory Care

Pulmonology devices encompass medical tools used for diagnosing, treating, and managing conditions related to the respiratory system. These instruments are essential for evaluating lung function, monitoring respiratory health, delivering therapeutic care, and supporting patients with breathing disorders through devices such as spirometers, inhalers, pulse oximeters, and ventilators.

Primary Factors Contributing to Growth in the Pulmonology Devices Market

A major factor propelling the pulmonology devices market is the increasing prevalence of respiratory diseases worldwide. These conditions affect the organs and tissues involved in breathing, including airways, lungs, and respiratory muscles, and are driven by causes such as rising air pollution, smoking, and exposure to occupational hazards. Pulmonology devices support better disease management by enabling accurate diagnosis, ongoing monitoring, and effective treatment, all of which enhance patient outcomes and quality of life.

Illustrating the Impact of Respiratory Disease Trends on Market Growth

For example, a study published in December 2023 by JAMA Network Open, a journal of the American Medical Association, highlighted that the global burden of chronic obstructive pulmonary disease (COPD) is expected to reach nearly 600 million cases by 2050. This projection represents a 23% rise in prevalence, underlining the growing need for pulmonology devices and contributing to the market's expansion.

Leading Region in the Pulmonology Devices Market

In terms of regional markets, North America held the largest share of the pulmonology devices market in 2025. Other key regions analyzed in the market report include Asia-Pacific, South East Asia, Western Europe, Eastern Europe, South America, the Middle East, and Africa, providing a comprehensive view of global market trends.

New strategic additions in our 2026 market reports include market attractiveness scoring and analysis, total addressable market (TAM) analysis, company scoring matrix graphics and tables, Excel-based forecasting dashboards, market hotspots infographics, key technologies and future

trend analysis, along with updated graphics and tables.
