

Apollo Inspections Marks 24 Years of Helping Henderson Homebuyers Make Informed Decisions

HENDERSON, NV, UNITED STATES, August 25, 2026 /EINPresswire.com/ -- Apollo Inspections LLC, a woman-owned residential and commercial property inspection company based in Henderson, is marking 24 years in business and more than 16,000 completed inspections. The milestone reflects the company's long-standing focus on helping Southern Nevada clients understand a property's condition through thorough inspections, clear explanations and detailed photographic documentation.

For buyers comparing [home inspections in Henderson, Nevada](#), Apollo's approach is designed to turn a complex report into practical information. Inspectors explain visible and accessible conditions, distinguish significant concerns from manageable maintenance items and recommend further evaluation by an appropriate specialist when needed.

"Success is when a client finishes an inspection informed rather than overwhelmed, understands the important conditions and knows what to do next," said Peri McCulloch, owner of Apollo Inspections. "You are not simply buying a report; you are choosing the people who will help you understand one of the biggest decisions you may ever make."

McCulloch has lived in the Las Vegas area since 1963 and built Apollo from hands-on experience in construction, restoration and property inspection. What began as a small operation grew into a multi-inspector company serving buyers, sellers, homeowners, investors, tenants and commercial clients across Clark County and in Pahrump.

Apollo's residential services include buyer and pre-listing inspections, home-maintenance inspections, manufactured-home and rental-property inspections, and reinspections. For new homes, the company offers pre-drywall inspections, pre-closing inspections, reinspections and 11-month warranty inspections. Apollo also performs commercial property inspections for purchases and leases, including condition documentation for commercial tenants.

When appropriate, inspections may include thermal or infrared imaging, sprinkler-system inspection and drone-assisted or elevated pole-camera roof views at no additional charge. Pool and spa inspections are available upon request in applicable inspections, and Apollo can coordinate outside providers for sewer scopes and termite inspections.

The company emphasizes education over alarm and practical honesty over unnecessary upselling. McCulloch's guiding principle, 'Documentation beats conversation,' is reflected in the team's extensive photographic records and its effort to make inspection findings useful to clients, builders and property professionals.

Apollo serves Henderson, Las Vegas, North Las Vegas, Summerlin, Boulder City, Mesquite, Laughlin and other communities throughout Clark County, as well as Pahrump in Nye County.
