

True Marker Pharmaceuticals Earns NABP Drug Distributor Accreditation

National accreditation validates True Marker Pharmaceuticals' adherence to stringent safety and regulatory standards in pharmaceutical wholesale distribution.

PHOENIX, AZ, UNITED STATES, August 25, 2026 /EINPresswire.com/ -- True Marker Pharmaceuticals is a pharmaceutical distribution company focused on delivering secure, reliable, and compliant supply chain solutions. Founded by industry veterans in pharmaceutical commercialization and wholesale distribution, TMP was established to solve critical challenges in supply chain transparency and product integrity.

NABP's Drug Distributor Accreditation is a resource for industry and regulatory bodies that establish uniform safeguards meant to protect the public health. Drug Distributor Accreditation plays a pivotal role in preventing counterfeit drugs from entering the United States drug supply and protects the public from drugs that have been contaminated, diverted, or counterfeited. This accreditation process required True Marker Pharmaceuticals to demonstrate compliance to a comprehensive set of regulatory standards and best practices in safely distributing prescription drugs from manufacturers to pharmacies and other institutions.

"Earning NABP Drug Distributor Accreditation is a major milestone that validates our unwavering commitment to supply chain integrity," said Davin Deb, DRIC at TMP. "As regulatory requirements evolve, our partners need absolute confidence that their distribution channels are secure, compliant, and transparent. This recognition reinforces True Marker's role as a trusted link between manufacturers and healthcare providers."

"NABP congratulates True Marker Pharmaceuticals on achieving this important recognition," says NABP Executive Director/Secretary Lemrey "Al" Carter, PharmD, MS, RPh. "By earning the Drug Distributor Accreditation, they demonstrate their commitment to preventing counterfeit drugs from entering the US drug supply, and they hold a pivotal role in protecting the public health."
