

Vyrian Accelerates RFQ Response with New Quoting and Sourcing Automation

New workflow tools speed up quoting and RFQ response while sourcing and quality decisions stay with Vyrian's team

HOUSTON, TX, UNITED STATES, August 25, 2026 /EINPresswire.com/ -- [Vyrian](#), a global distributor of semiconductors and electronic components specializing in obsolete, end-of-life, and hard-to-find parts, has deployed new workflow automation across its quoting and sourcing operations. The tools reduce repetitive administrative work and give sales and sourcing specialists more time for complex customer requirements.

The automation supports RFQ intake, quote preparation, inventory discovery, sourcing prioritization, pricing support, and order workflows. Customers continue to work with Vyrian's account teams, while supplier selection, final pricing, order approval, and quality reviews stay under human oversight.

Early internal results show faster quote turnaround and greater capacity to respond to complex RFQs. The company continues to refine the workflows as it expands their use across its operations.

The initiative supports Vyrian's effort to improve sourcing speed without reducing the accountability the independent components market requires. Parts continue through Vyrian's inspection, testing, and quality processes, including screening at its in-house [ISO/IEC 17025 accredited counterfeit testing lab](#), before shipment.

Strategic Partnership Enables Vyrian to Offer HP Products and Leverage HPE's Renowned Partner Ready Program

"Customers often come to Vyrian when they are facing a shortage, an obsolete component, or a production deadline," said Sath Sivasothy, VP of Sales at Vyrian. "By automating repetitive workflow steps, we help our teams respond faster while keeping sourcing decisions, quality review, and customer service in experienced hands. The result is faster quoting without giving up the controls our customers rely on."

About Vyrian

Vyrian is a global distributor of semiconductors and electronic components, specializing in shortage, obsolete, end-of-life, and hard-to-find material. Working across the open market and authorized channels, Vyrian supports OEMs, contract manufacturers, and enterprise procurement teams with urgent and hard-to-source requirements. The company operates offices in Houston, Warsaw, and Hong Kong, with an in-house ISO/IEC 17025 accredited counterfeit testing lab.
