

The STO Foundation/Tokenized Asset Foundation Launches v2 RWA Vendor & Supplier Directory for Tokenized Capital Markets

Expanded vendor directory connects issuers, asset owners, investors, & stakeholders with providers across the global real-world asset tokenization ecosystem

MIAMI, FL, UNITED STATES, August 26, 2026 /EINPresswire.com/ -- The Security Token Offering Foundation, Inc. today announced the launch of Version 2 of its RWA Vendor & Supplier Directory, available at <https://rwavendors.com>.

The expanded directory provides a central resource for discovering companies that support real-world asset tokenization, digital securities, and blockchain-based capital markets. It helps issuers, asset owners, investors, financial institutions, and technology companies identify providers across legal, compliance, issuance, custody, trading, payments, infrastructure, data, and other critical service areas.

The V2 directory currently includes 69 vendors across 12 primary categories and 52 specialized subcategories. The platform will continue to add qualified companies as the global tokenized asset market grows.

"Organizations entering the tokenized asset market need an easier way to identify the legal, technical, financial, and operational partners required to move from concept to execution," said Randy Goldberg, President of The [STO Foundation](#). "The new RWA Vendor & Supplier Directory

RWAVendors.com

brings these providers together in one place and gives prospective clients the information they need to evaluate capabilities, compare options, and make direct contact.”

Built for the Tokenized Asset Industry

The directory covers the primary services needed to develop, launch, manage, and scale tokenized asset projects, including:

- Capital strategy and advisory services
- Broker-dealers and transfer agents
- Tokenization platforms and blockchain infrastructure
- Securities attorneys and regulatory specialists
- Identity verification, AML, and compliance technology
- Institutional custody and wallet providers
- Trading platforms, exchanges, and liquidity providers

The Infrastructure Directory
for
Tokenized Capital Markets”

Randy Goldberg

- Banking, payment, and fiat on-ramp services
- Cap table, fund administration, and investor reporting platforms
- Data, market research, and intelligence providers
- Smart contract development and technical integrations
- Investor relations, marketing, and distribution services

Users can search and filter providers by category, subcategory, geographic region, asset class, and Foundation designation. They can also sort listings, save vendors for future review, visit vendor websites, and contact companies directly through individual profile pages.

More Detailed Vendor Profiles

V2 replaces basic directory listings with detailed profiles designed to help prospective clients evaluate each provider’s experience and fit.

Depending on the information available, profiles can include:

STO Foundation

- Company background and Foundation editorial summary
- Services and core capabilities
- Tokenization specialties
- Regulatory and jurisdictional coverage
- Industries and asset classes served
- Ideal client types and supported organization sizes
- Pricing and delivery models
- Typical implementation timeframes
- Headquarters, additional locations, and regions served
- Direct contact information and website links

The directory also displays Founding Member and Verified designations. The Founding Member badge identifies companies participating in the Foundation through a lifetime

Founding Membership. The Verified badge indicates that the company's listing, contact information, and stated credentials have been reviewed by Foundation staff.

Tokenized Asset Foundation

Supporting Vendor Discovery and Business Development

The directory gives tokenization vendors and suppliers a dedicated platform to present their capabilities to organizations actively researching service providers.

Eligible STO Foundation members can receive a detailed company profile, direct inquiry opportunities, Foundation membership recognition, and placement across up to five relevant categories. This allows multidisciplinary providers to appear wherever prospective clients are most likely to search for their services.

"The directory is designed to create practical connections across the ecosystem," Goldberg added. "A strong tokenized asset market depends on issuers being able to find qualified partners and service providers being able to reach the organizations that need their expertise."

Companies interested in joining The STO Foundation and being listed can learn more at <https://rwavendors.com/get-listed>.

Organizations searching for tokenization vendors and suppliers can explore the complete directory at <https://rwavendors.com>.

Directory Disclaimer

The STO Foundation Vendor & Supplier Directory is an independent information resource. Directory inclusion does not constitute an endorsement, recommendation, or warranty by The STO Foundation. Vendors are responsible for the accuracy of their listings, and users should conduct independent due diligence before engaging any listed company.

About The STO Foundation

The Security Token Offering Foundation, Inc., known as The STO Foundation, is an educational, networking, and market infrastructure platform supporting the global real-world asset tokenization and digital securities ecosystem.

Through education, industry intelligence, directories, events, community resources, and market-access initiatives, the Foundation connects issuers, investors, professionals, vendors, suppliers, and financial institutions building the next generation of tokenized capital markets.

The STO Foundation will rebrand as The Tokenized Asset Foundation in Q4 2026 to reflect its broader focus on the complete global tokenized asset market.
