

Entagl Launches Mirror, Expanding Its AI Agent Platform to Seven Products

US software company launches AI-powered treatment preview tool for service businesses

NEW YORK, NY, UNITED STATES, August 26, 2026 /EINPresswire.com/ -- Entagl Inc., a US software company that develops [AI agents for small and mid-sized service businesses](#), today announced the launch of Mirror, [an AI-powered preview tool](#) that allows prospective customers to visualize treatment outcomes before booking a consultation.

Entagl's Mirror widget lets website visitors preview a treatment on their own photo and leave their contact details with consent.

The launch expands Entagl's platform to [seven artificial intelligence products](#) designed to automate customer communication, lead generation, reputation management, marketing, and appointment-related workflows for clinics, salons, dental practices, and other appointment-based businesses.

“

Small business owners are not short on software. They are short on time.”

Didar Kursun, Chief Executive Officer and Co-Founder, Entagl Inc.

Mirror enables website visitors to upload a photo, generate a treatment preview, and share their contact information with consent. The tool is designed to help businesses improve consultation conversion by allowing prospective customers to better understand potential treatment outcomes before scheduling an appointment.

"Small business owners are not short on software. They

are short on time," said Didar Kursun, Chief Executive Officer and Co-Founder of Entagl. "Mirror was developed after hearing from clinics that one of the biggest challenges in converting leads is helping prospective customers visualize results before deciding to move forward."

In addition to Mirror, Entagl's platform includes AI agents for messaging, phone communications, social media engagement, reputation management, advertising optimization,

and content creation. Businesses can deploy the company's AI agents without writing code.

Entagl's products support customer interactions across WhatsApp, Instagram, Facebook Messenger, TikTok, Telegram, web chat, voice channels, and API integrations. The platform delivers responses using each business's own services, pricing, operating hours, and business rules.

The company reports customers in Canada, the United States, Turkiye, Egypt, Saudi Arabia, the United Arab Emirates, Uzbekistan, and Peru.

Founded by Didar Kursun and Omar Hassan, Entagl is a US company developing AI software that helps service businesses automate routine customer interactions and operational workflows.

About Entagl

Entagl Inc. is a US software company that develops AI agents for small and mid-sized service businesses. Its platform enables organizations to automate customer messaging, phone communications via Voice AI, lead generation, reputation management, marketing, and social engagement across multiple channels without requiring software development expertise.
