

Texas-Based Sign Company Completes Metal Canopies for HCI Commercial Project at Victory Shops Forney East

A Texas-based sign company fabricated and installed custom metal canopies for Victory Shops Forney East in collaboration with HCI Commercial

DALLAS, TX, UNITED STATES, August 26,

2026 /EINPresswire.com/ -- A Texas-

based sign company has completed

the fabrication and installation of

custom metal canopies for Victory

Shops Forney East in Forney, Texas, in

collaboration with HCI Commercial, a Dallas-based general contractor with extensive experience in retail, commercial and special construction projects.

“

Commercial projects require exterior solutions that combine durability, functionality and architectural appeal”

Hussain Haidar, Asst. Business Development Manager at Royal Signs & Awnings

The project provides another example of how specialized exterior fabrication can contribute to the appearance, functionality and architectural identity of growing commercial developments. Forney Shops East is part of the broader Victory Shops development along the US Highway 80 and FM 548 corridor, an area that has become an important retail destination within the rapidly expanding Dallas-Fort Worth market.

The Texas-based sign company, Royal Signs & Awnings, provided [custom metal canopy](#) fabrication and installation,

delivering exterior structures designed to complement the project's commercial architecture while providing practical coverage for building entrances and pedestrian areas.

Working alongside an established commercial general contractor such as HCI Commercial places specialized fabrication capabilities within the larger construction environment where developers, property owners and general contractors increasingly require coordinated exterior solutions.

HCI Commercial has built a portfolio spanning retail, healthcare, office, industrial and other commercial applications. The contractor's publicly showcased portfolio includes projects such as Sherwin-Williams and Cheyne Retail Center, demonstrating experience with retail construction and design-build projects.

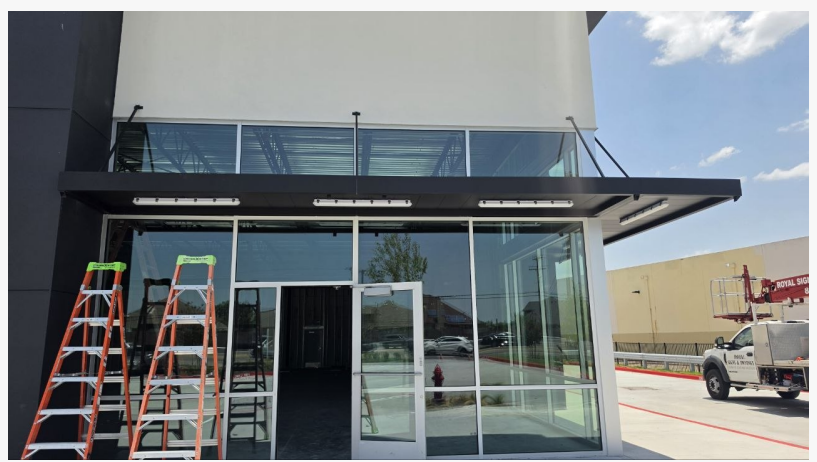

For sign contractors and architectural fabricators, projects like Victory Shops Forney East demonstrate the growing opportunity to support commercial construction beyond traditional storefront signage. Metal canopies, monument signs, pole signs and pylon signs can all play an important role in helping retail centers establish a recognizable presence from the street while creating a cohesive exterior environment.

The demand is particularly relevant in fast-growing Texas markets, where new retail centers, restaurants, medical facilities, automotive locations and mixed-use developments continue to create opportunities for specialized exterior fabrication.

The project also reflects the value of working directly within the commercial construction process. By coordinating fabrication and installation with the project's construction team, the Texas-based sign company was able to provide a turnkey canopy solution designed for the project's specific architectural and installation requirements.

Royal Signs & Awnings is positioning its commercial fabrication capabilities to support general contractors, developers, property owners, architects and national brands throughout Texas and beyond. Its capabilities include custom metal canopies as well as monument, pole and pylon signage for commercial properties.

As Texas communities continue to experience commercial and population growth, exterior architectural elements are becoming increasingly important to developers looking to create recognizable and functional properties. Projects such as Victory Shops Forney East illustrate how specialized fabrication partners can contribute to that process while helping construction teams execute exterior improvements efficiently.

Installation completed for Victory Forney East

Standing Seam Awning for Victory Forney East

For commercial developers and general contractors planning new construction, renovations, retail centers, medical facilities, restaurants or multi-location rollouts, partnering with an experienced Texas-based fabrication company can provide a single resource for major exterior signage and canopy requirements.
