

InventionHome® Inventor Creates Craft Table Umbrella Tent for Integrated Outdoor Workspace and Weather Protection

PITTSBURGH, PA, UNITED STATES, August 26, 2026 /EINPresswire.com/ -- LaTonya B. of Aliquippa, PA is the creator of the Craft Table Umbrella Tent, a dual-purpose outdoor workspace designed to combine a functional craft table with an integrated collapsible umbrella covering. The system is intended for users who display, assemble, sell, or work on craft materials outdoors and need a practical method for protecting both themselves and items on the tabletop from sun, rain, and other environmental conditions.

The system incorporates a central opening in the table surface through which an umbrella shaft can be positioned. A support stand located beneath the table receives and stabilizes the lower portion of the umbrella shaft, allowing the umbrella to extend above the tabletop without requiring the user to hold it manually. The umbrella may be constructed from weather-resistant vinyl or a comparable material and can extend over the table to provide overhead coverage. Weighted supports positioned along the table legs and/or umbrella edges can further increase stability in windy conditions.

The Craft Table Umbrella Tent eliminates the need to find a separate structure for supporting a conventional umbrella or tarp by integrating the table and umbrella into a single setup. The configuration allows users to maintain both hands available for crafting, organizing merchandise, or interacting with customers while remaining under the protective covering. Optional components, including rechargeable LED light strips and a Plexiglas tabletop shield, can provide additional functionality for nighttime use and protection of displayed or stored items.

Key features and benefits include:

- Integrated umbrella support: A central table opening accommodates the umbrella shaft and positions the covering directly above the workspace.
- Under-table shaft stand: A dedicated support beneath the table helps secure the umbrella and reduce movement during use.
- Weather protection: The overhead covering helps shield users and tabletop materials from rain, sunlight, and other outdoor conditions.
- Hands-free operation: Unlike a conventional handheld umbrella, the integrated design allows users to work with both hands while remaining under the covering.
- Optional LED lighting: Rechargeable LED light strips can provide illumination for evening or low-light operation.
- Collapsible configuration: The umbrella can be folded or collapsed when the system is being transported or stored.

The Craft Table Umbrella Tent addresses a common limitation associated with temporary outdoor craft tables: the lack of an integrated means of providing overhead protection. Conventional umbrellas may require separate stands, while handheld umbrellas occupy one of the user's hands and can become tiring to hold for extended periods. The integrated table-and-umbrella configuration provides a more organized approach to creating a covered outdoor workspace while maintaining accessibility to the tabletop.

LaTonya filed her Utility Patent with the United States Patent and Trademark Office (USPTO) and is working closely with [InventionHome](#), a leading invention licensing firm, to sell or license the patent rights to her Craft Table Umbrella Tent. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this product innovation.

Companies interested in the Craft Table Umbrella Tent can contact InventionHome at member@inventionhome.com. Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at info@inventionhome.com or by calling 1-866-844-6512.

About InventionHome®

InventionHome® is a top-rated invention marketing and product licensing company dedicated to helping inventors successfully patent, prototype, and promote their new product ideas. From securing intellectual property to connecting with potential licensees, InventionHome® offers a streamlined path to commercialization.
