

Royal 4 Systems and Michigan Turkey Producers Go Live with WISE WMS for QAD

Royal 4 Systems is proud to announce that Michigan Turkey Producers has begun live operations with Royal 4 WISE warehouse management system.

LONG BEACH, CA, UNITED STATES, August 26, 2026 /EINPresswire.com/ -- Royal 4 Systems is proud to announce that Michigan Turkey Producers has begun live operations with Royal 4 WISE [Warehouse Management System](#) (WISE WMS) at their Hall Street facility in Grand Rapids, MI. This plant handles cooking operations such as oven-roasted and pan-roasted meats, deli breasts, and private-label ready-to-eat items.

Royal 4 Systems is proud to announce that Michigan Turkey Producers has begun live operations with Royal 4 WISE warehouse management system (WISE WMS) at their Hall Street facility in Grand Rapids, MI.

Prior to implementing the Royal 4 WISE WMS, Michigan Turkey Producers were using an in-house developed solution written as a customization to their [QAD ERP](#) system. This home-grown system caused inaccurate inventory counting and spot checks, manual processes, workarounds, and limited warehouse visibility. By using WISE WMS, Michigan Turkey has now transitioned the WMS functionality to a commercial best-in-class application that provides:

- Enhanced Order Management: Improve picking accuracy and tracking of orders.
- Standardized Procedures: Document shipping and receiving workflows and establish clear protocols for handling issues.
- Performance Visibility: Set up and document departmental performance metrics for employee transparency and accountability.
- Real-Time Location-Based Perpetual Inventory – Provide automated stock management that tracks the exact location of every item and updates records whenever goods move, enter, or leave.
- QAD Response Times and Performance – Enhance customer service and operational efficiency with faster response times and seamless integration between WISE and QAD ERP.

Royal 4 has been partnering with QAD for over 30 years. Royal 4's system was the original WMS fully integrated to QAD and has been successfully implemented at many world-class QAD customers such as [Jel Sert](#), International Paints, International Foods, and Motor Parts of America (MPA).

Paul Carmody, President of Royal 4 Systems, stated, "Royal 4 integrates its WISE WMS into popular ERP systems so that companies have a choice as they grow and evolve their businesses. I'm proud that our integration with QAD has taken so many of our customers to the next level of warehouse management. Our customers have achieved up to 99% inventory accuracy and a 25% increase in warehouse efficiency – enabling growth without the need to hire additional staff. This results in a significant bottom-line impact year over year".

About Royal 4 Systems – Since 1984, Royal 4 Systems has been serving hundreds of clients across 6 continents with over 400 installations globally addressing their supply chain requirements. Royal 4 Systems has been named a Notable Vendor for the past 3 years in the Gartner Midmarket Magic Quadrant for Warehouse Management Systems. Royal 4 is highly configurable, scalable, and a real-time application that is platform and hardware-independent. Recognizing the efficiency of modernization of your cannabis operation is the difference between low-profit margins and higher sales, in addition to prioritizing your immediate needs and minimizing cost.
