

# MindCloud Ranks No. 5 in G2's Fall 2026 Momentum Grid® for iPaaS

*The company also secures three No. 1 rankings and a No. 3 Momentum position in E-Commerce Data Integration.*

CLEARWATER, FL, UNITED STATES, August 27, 2026 /EINPresswire.com/ -- [MindCloud](#) today announced that it ranked No. 5 among 100 integration platforms in [G2's](#) Fall 2026 Momentum Grid® Report for Integration Platform as a Service (iPaaS), placing the company among the fastest-rising integration platforms in the world.

MindCloud appeared in 19 Fall 2026 iPaaS reports and earned 10 badges, with significant gains across usability, customer relationships, business results, and overall market position.

The company also delivered a leading performance in E-Commerce Data Integration, ranking No. 3 for Momentum and securing three No. 1 mid-market rankings for Results, Usability, and Customer Relationships.

"Ranking fifth in iPaaS Momentum is a major milestone for MindCloud," said Jamie Royce, CEO of MindCloud. "We are competing alongside companies with decades of market presence. Our trajectory shows that customers are looking for a different integration model—one that combines enterprise-grade technology with a partner who takes responsibility for making it work."

One of the fastest-rising iPaaS platforms MindCloud's No. 5 position represents its first appearance in G2's iPaaS Momentum Grid. Its broader Fall results reinforce that trajectory:

- No. 5 in the iPaaS Momentum Grid.
- No. 5 in overall iPaaS Usability, up from No. 11.

- No. 7 in Mid-Market Customer Relationships.
- No. 9 in Mid-Market Usability.
- No. 10 in overall Customer Relationships, up from No. 16.
- No. 11 in the Americas Regional Grid, up from No. 19.
- No. 14 in overall Results, up from No. 20.
- No. 19 in the overall iPaaS Grid, up from No. 23.
- No. 20 in the Small-Business iPaaS Grid, up from No. 27.

MindCloud also entered several mid-market iPaaS reports for the first time, earning immediate top-10 placements for both Usability and Customer Relationships.

“Momentum indicates where a market is going, but the reasons behind that momentum matter even more,” Royce said. “Customers are recognizing MindCloud for usability, relationships, and measurable results—not simply for having a long list of features.”

No. 1 where customer success matters MindCloud’s E-Commerce Data Integration results demonstrate how the platform performs in complex, operationally critical environments.

The company ranked:

- No. 1 in Mid-Market Results.
- No. 1 in Mid-Market Usability.
- No. 1 in Mid-Market Customer Relationships.
- No. 2 in overall Results and Usability.
- No. 3 in Momentum.
- No. 4 in the Mid-Market Grid.
- No. 7 in the overall Grid.

MindCloud earned 12 badges across 16 E-Commerce Data Integration reports and placed among the top five products in 11 of them.

E-commerce businesses operate across storefronts, marketplaces, ERPs, warehouses, fulfillment providers, payment systems, and financial platforms. When those systems fail to communicate, the result is delayed orders, inaccurate inventory, manual work, and poor customer experiences.

“These rankings validate our ability to make that complexity manageable,” Royce said. “Being No. 1 for results, usability, and relationships means customers are not only achieving meaningful outcomes—they trust the platform and the people helping them get there.”

Built for complexity. Backed by people who make it work. MindCloud combines an enterprise-grade integration platform with a delivery team that can scope, architect, build, launch, monitor, and continuously improve production integrations. Unlike software-only approaches that leave

customers to implement and maintain workflows themselves—or hire separate consultants—MindCloud supports the complete integration lifecycle.

Customers use MindCloud to connect ERP, CRM, e-commerce, accounting, fulfillment, HR, and other critical systems. These integrations eliminate manual data entry, improve data accuracy, coordinate operations, and create the reliable movement of information businesses need to scale.
