

AP Technology Brings APSecure Payment Automation to Banks at TMANY NYCE 2026

APSecure Helps Extend Bank Services Beyond Branch Locations with Remote Official Check Printing.

NEW YORK CITY, NY, UNITED STATES, August 31, 2026 /EINPresswire.com/ -- [AP Technology](#), a provider of secure payment issuance solutions to banks and businesses for nearly 40 years, will showcase [APSecure](#) 5.0, its advanced multi-payment issuance and workflow automation platform, at the TMANY New York Cash Exchange (NYCE), Sept. 1-2 in New York City.

Banks, treasury professionals and other NYCE attendees are invited to visit AP Technology at Booth #207 to see how APSecure can help financial institutions modernize payment operations, automate manual processes and extend valuable payment services to business customers beyond traditional branch locations.

APSecure brings checks, ACH, wire transfers, card payments and other digital payments together within a single secure platform. Configurable workflows automate approval chains, signatures and release processes, helping financial institutions and their customers accelerate disbursements while strengthening control and visibility.

A key capability for banks, particularly on the east coast is [Remote Official Check Printing](#), which enables authorized business customers to securely print customer-ready official checks (Good Funds) at remote locations. The technology can eliminate branch visits, courier deliveries and overnight shipments of cashier's checks — giving banks an effective way to serve customers across a larger geographic footprint, including markets where they may have few or no physical

TECHNOLOGY

branches.

“Banks are looking for ways to deliver more value to their business customers without adding more manual processes or relying on additional branch infrastructure,” said Richard Love, CEO at AP Technology. “APSecure gives financial institutions a secure way to automate payment issuance, expand remote banking services and support customers that need payments delivered quickly. Remote Official Check Printing is especially powerful because it can bring the bank’s payment capabilities directly to the customer’s location while helping the bank compete for valuable commercial relationships and deposits.”

Remote Official Check Printing can be particularly valuable for law firms and real estate professionals supporting real estate closings, where access to official checks can affect closing timelines. Instead of traveling to a branch or waiting for a cashier’s check to be delivered, authorized users can securely issue checks when and where they are needed.

“

Remote Official Check Printing is especially powerful because it can bring the bank’s payment capabilities directly to the customer’s location”

Richard Love, CEO, AP Technology

APSecure is designed for banks and organizations seeking security, scalability, faster payments, and greater productivity through automation. Key capabilities include:

- Multi-payment issuance: Manage checks, ACH, wire transfers, cards and digital payments from one platform.
- Configurable workflow automation: Establish approval workflows, permissions, signatures and controls based on organizational requirements.
- Bank-level security: Protect transactions with advanced authentication, encryption and centralized user management.
- Remote printing flexibility: Securely approve and print checks from remote locations.
- Seamless integration: Connect with existing core banking systems and OFAC systems through API-driven integration.
- Cloud scalability: Deploy in the cloud or on local servers, with Azure and AWS support.

**ADVANCED PAYMENT WORKFLOWS
FOR BANKS &
BUSINESSES**

REMOTE AND LOCAL PAYMENTS

- ▶ Advanced Workflow Options
- ▶ Individual Approval Thresholds
- ▶ System Reports & Logging
- ▶ Automated Funds Transfer
- ▶ OFAC Integration
- ▶ Complete Payment Transparency

AP Technology: Advanced Payment Workflows for Banks and Businesses

- Mobile optimization: Access approvals and workflows securely from wireless devices.
- Advanced processing and reporting: Support higher transaction volumes, payment attachments and high-volume reporting.
- SSO authentication: Integrate with single sign on (SSO) environments for centralized access and authentication, enabling internal and external management.

For banks, these capabilities create opportunities to replace fragmented, discontinued, or manual payment processes with an integrated platform built to accommodate evolving customer and technology requirements. AP Secure is trusted by banks and financial institutions throughout the United States and Canada.

The graphic features a dark blue background with a subtle pattern of binary code and dollar signs. At the top center is the AP Technology logo, which consists of the letters 'AP' in white inside a red oval, with the word 'TECHNOLOGY' in small white capital letters below it. Below the logo, the text 'AP TECHNOLOGY' is written in large, bold, white capital letters. Underneath that, the phrase 'Advanced Payment Workflows for Banks & Businesses' is written in a smaller, italicized white font. Below this text are four red icons arranged horizontally: a person with a heart (Trust), a gear with a signal tower (Efficiency), a shield with a lock (Security), and a lightbulb (Convenience). Each icon is labeled with its respective word in white capital letters: TRUST, EFFICIENCY, SECURITY, and CONVENIENCE. At the bottom of the graphic, there are three white icons (phone, email, and globe) followed by the contact information: 800.652.2877, Sales@APTechnology.com, and www.APTechnology.com.

AP Technology: Creating payment solutions for banks and businesses of any size since 1989

Attending NYCE 2026? Visit AP Technology at Booth #207 on Sept. 1-2 to learn how AP Secure can modernize payment issuance, automate workflows and extend bank services beyond the branch.
