

Texas Alliance Group Selects Texas Sign Company for Custom Metal Canopies at AutoZone in Katy

Royal Signs & Awnings fabricated and installed custom metal canopies for an AutoZone project in Katy in collaboration with Texas Alliance Group.

KATY, TX, UNITED STATES, August 26, 2026 /EINPresswire.com/ -- Royal Signs & Awnings recently fabricated and installed [custom metal canopies](#) for an AutoZone location in Katy, Texas, in collaboration with Texas Alliance

Group, a national commercial and retail general contractor with a portfolio spanning projects across the United States.

Royal Signs & Awnings Logo

“

This project demonstrates our ability to deliver custom exterior solutions for major retail construction programs.”

Heather D, Director of Operations at Royal Signs & Awnings

The project highlights Royal Signs & Awnings' capabilities in the fabrication and installation of architectural metalwork for major commercial and retail developments. By delivering custom metal canopies for a nationally recognized automotive retailer, the project demonstrates the company's ability to support general contractors and developers with exterior structures that combine durability, functionality and visual impact.

Texas Alliance Group has established a significant presence in commercial and retail construction. According to the contractor, the company has completed more than 723 projects across 35 states and is licensed as a general contractor in more than 20 states. TAG specializes in commercial construction, retail, design-build and build-to-suit projects, making the collaboration an important example of how specialized exterior fabrication partners can contribute to large-scale construction programs.

The Katy AutoZone project adds to a broader pattern of commercial development involving both organizations. Public project records identify the AutoZone location at 23919 FM 529 in Katy as a

ground-up, 7,147-square-foot retail development with an estimated construction cost of approximately \$797,453. The project was completed in 2025.

For Royal Signs & Awnings, the work represents more than a completed canopy installation. It reinforces the company's position as a commercial fabrication and installation partner capable of working alongside general contractors on retail, automotive and other high-visibility developments.

Custom metal canopies can play an important role in commercial architecture by defining entrances, improving weather protection and creating a more finished exterior appearance. For developers and contractors managing multi-location construction programs, having a qualified fabrication and installation partner can also help streamline coordination between construction schedules, architectural requirements and site installation.

Royal Signs & Awnings provides commercial signage and exterior architectural products for businesses and construction professionals throughout Texas and nationwide. Its capabilities include custom metal and fabric canopies, monument signs, pole and pylon signs, illuminated signage, channel letters, cabinet signs and other exterior and interior branding solutions.

The company works with general contractors, developers, property owners and national brands on individual locations as well as broader rollout programs. Its experience with commercial fabrication and field installation enables projects to be coordinated from production through installation, helping clients maintain consistency across their properties.

The AutoZone project in Katy also reflects an opportunity for contractors and developers to

Installation in-process at AutoZone

Installation completed

engage specialized vendors earlier in the construction process. Canopies, monument signs and pole or pylon signs can be important components of a retail property's exterior identity, making experienced fabrication and installation partners valuable additions to commercial construction teams.

As retail, automotive and other commercial developments continue expanding across Texas, Royal Signs & Awnings is seeking opportunities to collaborate with general contractors, developers, architects and national brands on upcoming construction projects requiring custom canopies, monument signs, pole signs, pylon signs and complete exterior signage packages.

Companies planning new construction, renovations, retail rollouts or multi-location developments can contact Royal Signs & Awnings to discuss fabrication, installation and project requirements.
