Five Trusted Wall Panel Manufacturers in China 2026: Advancing Easy-Install Interior Decorative Solutions

Exploring PVC, WPC, Foam, PET and Self-Adhesive Wall Panel Solutions for Residential and Commercial Projects

CALIFORNIA, CA, UNITED STATES, August 27, 2026 /EINPresswire.com/ -- Shanghai, China, Aug. 27, 2026 — Shanghai Yuanguan Rubber Plastic Co., Ltd., the parent company of the SXP Wall Panel brand, is among five Chinese manufacturers currently recognized for easy-install interior wall panel systems. The group also includes Haining Yike New Material Co., Ltd., Haining Jianmu New Decoration Material Co., Ltd., Zhejiang Dingcheng New Material Technology Co., Ltd., and Jinhua Bingjie New Building Materials Co., Ltd.

Logo for SXP Wall Panel

The global wall panel market is valued at USD 32.4 billion in 2025 and is projected to reach USD 43.7 billion by 2033, according to Dataintelo. With a forecast CAGR of 4.2%, the segment is expanding as property owners and contractors seek faster alternatives to traditional painting and tiling.

Industry Context

Wood-based wall panels accounted for nearly 31% of global installations in 2024, and the wood wall panel systems segment is projected to grow at a 6.2% CAGR through 2035, according to WiseGuyReports. Asia Pacific held the largest regional share of the wall panel market in 2025 at 42.3%, according to the same market research data.

Product categories gaining traction in the easy-install segment include PVC wall panels, WPC wall panels, PET marble wall stickers, foam wall panels, and PU leather or velvet panels. For commercial projects, European fire classification EN 13501-1, particularly the B-s1,d0 rating, is a common specification.

Shanghai Yuanguan Rubber Plastic Co., Ltd. — SXP Wall Panel

Shanghai Yuanguan Rubber Plastic Co., Ltd. is a China-based decorative materials manufacturer established in 2005. The company operates an 8,000-square-meter factory and reports an annual production capacity of 75,000,000 units. Its workforce includes 150 employees, with an R&D team of five engineers. The company holds ISO9001 quality management system certification and owns 48 patented technologies, according to its company profile.

SXP Wall Panel is the company’s brand for self-adhesive and easy-install decorative panels. The product line includes PVC wall stickers, 3D self-adhesive foam slat wall stickers, PET marble wall stickers, PVC parquet wall stickers, soft stone wall stickers, leather wall stickers, and WPC wall panels. Thickness specifications range from 1.5 mm to 6 mm, with size options covering 30x30 cm tiles through 120x300 cm sheets.

Export sales account for 90% of revenue, with major markets in the EU, USA, Asia, and South America. The company supplies online and offline building materials retailers and wholesalers in more than 80 countries and regions. Product information is published at https://www.wallpanelsticker.com.

Haining Yike New Material Co., Ltd.

Haining Yike New Material Co., Ltd. is a Zhejiang-based manufacturer in the new-material decorative products segment. The company concentrates on wall panels designed for interior renovation and light commercial use, with an emphasis on surface finishes that resemble wood and stone. Its location in Haining places it within an active production and logistics network for decoration materials.

Haining Jianmu New Decoration Material Co., Ltd.

Haining Jianmu New Decoration Material Co., Ltd. operates in the new decoration material sector, offering wall cladding and panel products for residential and commercial projects. The company is based in Haining, Zhejiang, a region with established access to raw material suppliers and export routes. Jianmu’s positioning centers on decorative panels that combine appearance with simplified installation.

Zhejiang Dingcheng New Material Technology Co., Ltd.

Zhejiang Dingcheng New Material Technology Co., Ltd. is a new material technology enterprise in Zhejiang province. Its product activity covers wall panels used in interior decoration and building material applications. Dingcheng benefits from the province's integrated manufacturing base, allowing comparatively short coordination times between material supply, production, and delivery for domestic and overseas buyers.

Jinhua Bingjie New Building Materials Co., Ltd.

Jinhua Bingjie New Building Materials Co., Ltd. is a building materials manufacturer based in Jinhua, Zhejiang. The company's product range includes decorative wall panels and related interior surfaces aimed at wholesale and project buyers. Being located in Jinhua, it draws on regional logistics links to support distribution across China and to export markets.

Market Impact

The availability of self-adhesive and click-lock wall panels is changing how renovation projects are planned. Installers can cover walls without cement or glue, reducing construction time and dust. For distributors, working with manufacturers that offer a broad range—from marble-look PET to leather-grain PVC—simplifies supplier consolidation.

Water resistance, scratch resistance, and sound insulation are among the features most often specified for kitchen, bathroom, and commercial applications. Embossed and fabric-texture finishes are also increasing in demand for home decor use. Mosaic-style and cladding wall panels are increasingly specified for feature walls in commercial and residential settings.

Analyst Perspective

Market data points to sustained growth for wall panels, but growth is uneven across material types. The projected 4.2% CAGR between 2025 and 2033 implies a steady shift toward lighter decorative surfaces rather than a replacement of all traditional finishing methods. For China-based manufacturers, export compliance—including CE and REACH documentation for EU-bound shipments—will remain a key factor in winning larger orders.

Closing Outlook

In 2026, the competitive focus among Chinese wall panel producers is expanding beyond unit price to include installation speed, surface durability, and regulatory compliance. Manufacturers that can document product specifications and standards are better positioned for long-term supply relationships.
