

Avalue Named 'Classic Extraordinary Enterprise – Global Excellence' at the 2026 New Taipei City Enterprise Classic Award

NEW TAIPEI CITY, TAIWAN, August 27, 2026 /EINPresswire.com/ -- [Avalue Technology](#) Named “Classic Extraordinary Enterprise – Global Excellence” at the 2026 New Taipei City Enterprise Classic Award. Receives three honors across the Global Excellence and Sustainable Development categories.

The 2026 New Taipei City Enterprise Classic Award ceremony was held on August 24, with New Taipei City Mayor Hou Yu-ih presenting the awards to this year's honorees. Avalue Technology was honored to receive three awards: “Classic Extraordinary Enterprise – Global Excellence,” “Award-Winning Enterprise – Global Excellence,” and “High-Quality Potential Enterprise – Sustainable Development.” Philip Chang, General Manager of Avalue Technology, represented the company at the ceremony.

Organized by the New Taipei City Government's Economic Development Department, the New Taipei City Enterprise Classic Award recognizes companies for their achievements in business development, competitiveness, corporate social responsibility, and ong-term commitment to New Taipei City. Built around four themes — innovation, global vision, sustainability, and deep roots in New Taipei City — the award process includes document review, on-site evaluation, and final judging.

Avalue was recognized in both the Global Excellence and Sustainable Development categories this year. The company was also named one of only four “Classic Extraordinary Enterprises,” the award program's highest distinction, representing the Global Excellence category. These honors recognize Avalue's growth from New Taipei City into global markets, along with its continued efforts in sustainable development.

From New Taipei City to Global Markets
Founded in Zhonghe, New Taipei City in 2000, Avalue has grown from its headquarters and R&D base in Taiwan into an international industrial computing company with operations spanning Asia, the Americas, and Europe. Overseas markets have consistently contributed close to 95% of the company's revenue.

Avalue's global network brings together its headquarters, regional operations, and local teams, supported by direct sales and distribution channels. This structure enables Avalue to stay close to customers across different markets and provide localized sales and technical support.

As Edge AI and AIoT continue to reshape industrial applications, Avalue is focused on five key vertical markets: smart healthcare, smart manufacturing, smart transportation, smart retail, and smart energy. The company is bringing AI, AIoT, and Edge AI technologies into a growing range of real-world applications. In smart healthcare, Avalue has built more than 20 years of experience, applying its technology and system integration expertise across a broad range of healthcare applications.

The "Classic Extraordinary Enterprise – Global Excellence" and "Award-Winning Enterprise – Global Excellence" honors recognize Avalue's years of international development and its approach of building global reach from its roots in New Taipei City.

Growing Globally with Sustainability in Mind

Avalue was also recognized as a "High-Quality Potential Enterprise – Sustainable Development." The company integrates sustainability into its operations, with initiatives spanning corporate governance, energy efficiency and carbon reduction, greener product development, and responsible supply chain management.

Avalue continues to strengthen its carbon management, improve energy efficiency, and incorporate greener practices into product design. From 2023 to 2025, the company received recognition for three consecutive years in the Cathay United Bank × CDP Commercial Bank Environmental Disclosure Program, making Avalue the only company to be honored three years in a row. Its CDP rating also improved from D in 2020 to B in 2025.

Moving Forward from New Taipei City

"Receiving three honors from the New Taipei City Enterprise Classic Award means a great deal to Avalue and gives us even more momentum for what comes next," said Philip Chang, General Manager of Avalue Technology. "We started in New Taipei City and have grown step by step into global markets. Looking ahead, we will keep investing in intelligent technologies, expanding our global presence, and making sustainability part of how we grow. Together with our partners around the world, we aim to create lasting value and bring more of Taiwan's technology capabilities to the global stage."

Building on its global operations and R&D base in New Taipei City, Avalue will continue to advance AI, AIoT, and Edge AI applications across its key vertical markets. The company will also move forward with ESG governance, lower-carbon operations, greener products, and sustainable supply chains, working with customers and partners worldwide to drive the next generation of intelligent applications.
