

Scalo joins Anthropic's Claude Partner Network

The partnership provides Scalo with access to Anthropic's training, certification & enablement resources to expand platform-specific expertise and capabilities.

WROCLAW, POLAND, August 27, 2026 /EINPresswire.com/ -- [Scalo](#) has joined Anthropic's Claude Partner Network as a Registered Partner, expanding its access to training, certification, and enablement resources related to the Claude AI platform.

Scalo logo

Growing demand for practical AI implementation

The announcement comes as organizations across industries increasingly explore artificial intelligence as part of broader digital transformation and business modernization initiatives. While many businesses have moved beyond evaluating AI's potential, they continue to face challenges related to implementation, governance, scalability, and integration with existing systems.

“

A year or two ago, clients were exploring possibilities. Today, they're looking for practical ways to deliver value and move faster.”

*Jakub Stadnik, Head of
Delivery, Scalo*

According to Scalo, client demand has shifted toward practical AI use cases focused on operational efficiency, customer experience, decision support, and business process optimization.

Expanding access to AI training and expertise
As a member of the Claude Partner Network, Scalo gains

access to Anthropic's partner resources, including technical training, certification pathways, and educational programs designed to support the development of expertise in building solutions with Claude.

The partnership reflects the growing importance of specialized skills in generative AI, software engineering, cloud technologies, and data platforms as businesses seek to move AI initiatives

from experimentation to production.

Supporting organizations across the AI adoption lifecycle

Scalo reports that organizations are increasingly seeking support in several areas of AI adoption, including:

- Identifying business processes and opportunities where AI can deliver measurable value
- Designing, building, and deploying AI-powered applications for production use
- Applying generative AI technologies to operational and customer-facing challenges
- Establishing governance frameworks and responsible AI practices

"The conversation around AI has changed quickly. A year or two ago, clients were exploring possibilities. Today, they're looking for practical ways to deliver value and move faster," commented Jakub Stadnik, Head of Delivery at Scalo. "We've been investing in the expertise and capabilities needed to support that journey, and joining the Claude Partner Network is an important part of that commitment."

Broader investment in AI capabilities

The company has continued to expand its capabilities in artificial intelligence, data, cloud technologies, and software development in response to evolving client requirements and increased interest in AI-enabled solutions.

Scalo's focus has been on developing the expertise, delivery practices, and technical capabilities required to support organizations implementing AI at scale.

As AI adoption continues to mature, industry attention is increasingly focused on moving projects beyond pilot stages and into scalable, business-critical deployments. Partnerships between technology providers and implementation partners are expected to play an important role in helping organizations navigate this transition.

About Scalo

Scalo is a trusted software development and [technology talent partner](#) with nearly 20 years of experience in delivering future-ready solutions to help organizations achieve sustainable growth in the digital era. Headquartered in Poland, the company supports clients across the USA, Europe, and the Middle East, specializing in custom software development, data management, [AI consulting](#) & outsourcing, and team augmentation.
