

Quectel Global Center by Quectel Wireless Solutions Wins Platinum A' Design Award

Quectel Global Center Recognized in the A' Construction and Real Estate Projects Design Award Category

COMO, CO, ITALY, August 27, 2026

/EINPresswire.com/ -- The A' [Design Award](#) has announced Quectel Global Center by [Quectel Wireless Solutions Co., Ltd.](#) as a Platinum winner in the Construction and [Real Estate](#) Projects Design category. The A' Design Award is one of the world's most respected and highly regarded recognitions in the field of real estate and construction design, evaluating entries through a rigorous and objective process. This honor acknowledges Quectel Global Center as an exceptional example of good design that merges office efficiency, brand expression, and urban ecology. The recognition positions the

project as a notable contribution to contemporary high technology corporate headquarters design. It reflects the careful balance achieved between internal operations and public engagement.

The A' Construction and Real Estate Projects Design Award holds relevance for the broader industry by highlighting projects that respond to current needs in urban development and sustainable workplace design. Quectel Global Center demonstrates how corporate headquarters can serve as open complexes that coexist harmoniously with the city and its ecology. By raising the entire ground floor and integrating three dimensional greenery, the project frees public space and conveys an open and inclusive ethos. Such an approach aligns with evolving standards that value community contribution alongside operational performance. The design offers practical benefits for employees, visitors, and the surrounding urban environment.

Quectel Global Center

Quectel Global Center creates an efficient, health conscious, and creativity inspiring work environment that merges internal office functions with public facing exhibition capabilities. The office areas face the riverside to maximize scenic views, while street facing areas reinforce brand presence through an open passage. Drawing inspiration from the corporate philosophy of connecting everything, the project employs an interlocking, staggered layout that symbolizes collaboration among teams and integration with the city. The facade features fluid horizontal lines that abstractly evoke the flow of information, paired with transparent glass curtain walls for a futuristic visual identity. Externally, aluminum panels finished with PVDF coating and insulating LOW E glass enhance weather resistance and thermal insulation, while internal materials such as marble, wood veneers, and engineered quartz ensure durability and visual appeal.

This recognition may serve as a reference point for future projects that seek to balance internal connectivity with operational independence. The shared building and differentiated organization strategy, supported by a central elevator system and dedicated access for management, translates competing requirements into a clear and flexible spatial framework. For the team at Quectel Wireless Solutions Co., Ltd., the Platinum A' Design Award offers encouragement to continue exploring design solutions that connect enterprise, employees, and city. The honor reinforces an ongoing commitment to thoughtful and responsible design practice.

Interested parties may learn more about Quectel Global Center and its designers at the dedicated page on the A' Design Award website. The page provides further detail regarding the project features, materials, and design approach. Visitors are invited to explore the work and contact the company for additional information.

About Quectel Wireless Solutions Co., Ltd.

Quectel Wireless Solutions Co., Ltd. is a globally leading manufacturer of Internet of Things cellular modules. Established in 2010 with its headquarters in Shanghai, China, the company has focused on this field for more than ten years and has gradually completed its global layout. On July 16, 2019, Quectel was listed on the main board of the Shanghai Stock Exchange under the stock code 603236, and in 2021 it accounted for nearly 40 percent of global IoT communication module market shipments. The company currently employs over 8,000 people worldwide, of whom 74 percent are technical personnel, and its main products include cellular communication modules, short range wireless communication modules, GNSS positioning modules, EVB tool antennas, and Internet of Things cloud platforms.

About the Platinum A' Design Award Recognition

The Platinum A' Design Award is the highest accolade bestowed by the A' Design Award, granted to works that demonstrate notable innovation alongside meaningful societal contributions. Recipients are recognized for technical proficiency, artistic skill, and a commitment to advancing the boundaries of art, science, design, and technology. Within the Construction and Real Estate Projects Design category, evaluation considers criteria including innovative use of space, sustainable design implementation, architectural excellence, integration with the surrounding

environment, functional efficiency, and aesthetic appeal. Additional considerations include the inclusion of smart technologies, incorporation of green spaces, user comfort, design durability, efficient use of materials, and consideration of local climate. Designs receiving this recognition reflect a high standard of excellence and offer worthwhile contributions to the built environment.

About A' Design Award

The A' Construction and Real Estate Projects Design Award is a premier competition for the construction and real estate industry, offering leading companies, designers, and brands an opportunity to present their works and gain international recognition. Entries are blind peer reviewed and assessed against pre established evaluation criteria by a world class jury panel comprising design professionals, real estate industry experts, journalists, academics, and designers. Organized since 2008 and now in its 18th year, the A' Design Award is an international and juried design competition open to entries from all countries and across all industries. The ultimate aim of the A' Design Award is to recognize and promote superior products and projects that advance and benefit society, driven by a philanthropic mission to help create a better world through the power of good design.
