

AB Plastic Surgery Showcases Korean Facelift Techniques at 2026 IFAAS

AB Plastic Surgery presented Full SMAS Facelift, Neck Lift and Submentoplasty techniques during a live surgery session at IFAAS 2026 in Seoul.

GANGNAM, SEOUL, SOUTH KOREA, August 28, 2026 /EINPresswire.com/ -- AB Plastic Surgery Korea announced the successful completion of the [2026 International Lifting Symposium](#) on August 19, 2026 in collaboration with the International Fellowship in Advanced Aesthetic Science (IFAAS), highlighting advanced Korean facelift surgery and anti-aging techniques for international medical professionals.

IFAAS is an international academic platform where leading specialists in plastic surgery and aesthetic medicine gather to share clinical expertise and advanced techniques. The symposium was held at AB Plastic Surgery in Korea to share Korea's distinctive expertise in anti-aging surgery with overseas medical professionals.

<Advanced Korean Facelift and Combined Lifting Techniques>

[Dr. Yeon-Woo Jeong](#) of AB Plastic Surgery served as the main lecturer, presenting on advanced Korean facelift surgery and combined lifting techniques.

Drawing on his anatomical understanding, Dr. Jeong introduced his distinctive surgical approach and drew significant interest from the attending medical professionals.

In particular, he explained the core principles of advanced facelift surgery that go beyond skin excision by addressing both the deeper SMAS layer and the platysma muscle.

Dr. Jeong also presented a comprehensive [anti-aging solution](#) that combines Full SMAS Facelift, Neck Lift, Submentoplasty, Facial Liposuction, Subbrow Lift and Lower Blepharoplasty to address multiple signs of facial aging, including deep neck wrinkles, loss of jawline definition and sagging around the eyes.

<International Medical Professionals Observe Live Facelift Surgery>

During the Live Surgery session, international medical professionals entered the operating room to closely observe Dr. Jeong throughout the surgical procedure.

Dr. Jeong demonstrated precise surgical techniques designed to minimize the risk of nerve injury and reduce incision scarring while creating natural, youthful facial contours tailored to each patient's facial features and proportions.

Under his professional guidance, participating medical professionals gained deeper insight into advanced facial surgery techniques and their clinical application.

<Sharing Korean Plastic Surgery Expertise Globally>

Dr. Yeon-Woo Jeong said, "It was meaningful to introduce the advanced techniques and safe surgical guidelines of Korean plastic surgery directly to medical professionals from around the world."

He added, "Beyond simply creating a younger appearance, we will continue our research and academic activities to achieve natural lifting results that preserve each patient's individual characteristics."

AB Plastic Surgery continues to actively participate in international academic conferences and operate training programs for overseas medical professionals, further strengthening the presence of Korean plastic surgery and K-medical aesthetics in the global aesthetic medicine field.
