

Influential Women Profiles Valli Dologlou: Senior Technical Program Manager At Microsoft

REDMOND, WA, UNITED STATES, August 28, 2026 /EINPresswire.com/ -- Bringing More Than 30 Years of Technology Experience to Digital Transformation, AI, and Modern Customer Support

Redmond, Washington — Valli Dologlou is a Senior Technical Program Manager at Microsoft specializing in digital transformation, AI, and modern customer support. Recognized for architecting and executing large-scale digital transformation initiatives across global teams, she brings more than 30 years of experience in technology, supported by advanced degrees in Computer Science and Medical Information Systems. Her career reflects a rare combination of technical depth, business acumen, and operational excellence.

Throughout her career, Valli has delivered measurable outcomes by translating complex business needs into scalable technical solutions, optimizing processes, and driving the adoption of modern support models and AI. She is known for her ability to lead through ambiguity, align cross-functional stakeholders, and deliver strategic objectives in high-stakes environments.

Valli's leadership journey began in Greece, where she broke barriers in a male-dominated industry while establishing a reputation for resilience and credibility. Her willingness to embrace change has remained a defining characteristic throughout her career. From transitioning from technical roles into program leadership to relocating internationally, she has consistently demonstrated the adaptability needed to drive transformation at both regional and global levels.

For Valli, adaptability, resilience, and a willingness to learn from failure and others have been central to her success. She views every challenge as an opportunity to grow, refine her approach, and lead with impact. At the same time, she emphasizes that success is ultimately a team outcome, with clarity, trust, and alignment serving as the foundation of her work.

One of the most influential pieces of advice Valli received came from her mother early in her career: "Don't be afraid to try and fail, be afraid not to learn from it and never make the same mistake twice." This principle has shaped her approach to technology and leadership. In an industry defined by uncertainty and constant change, Valli believes that stepping forward even when the outcome is not guaranteed is essential to growth. Failure, in her view, is not the end but a catalyst for learning and progress.

Valli also encourages young women entering technology to own their expertise and never allow others to define their potential or limits. She emphasizes that failure should not be feared as long as there is a willingness to learn from it. Building credibility through results, investing in professional networks, seeking mentors and allies, and approaching opportunities with confidence and purpose are among the principles she advocates.

Looking toward the future, Valli sees the accelerating pace of AI capabilities as both a disruption to the industry and a significant opportunity. She believes staying relevant requires lifelong learning and comfort with uncertainty. As AI and digital transformation reshape every aspect of work, she believes those who remain open-minded and adapt quickly will be positioned to lead the way.

Integrity, curiosity, and impact remain the values most important to Valli in both her professional and personal life. She strives to lead with honesty, remain open to new ideas, and use her skills to create a positive impact through mentoring others, building inclusive teams, and supporting her community.
