

Forza Logistics Group Strengthens Freight Fraud Protection With Forza Shield™

Forza combines Highway, GenLogs, Carrier411, MacroPoint and E3 Group in a layered defense against freight fraud and cargo theft.

INDIANAPOLIS, IN, UNITED STATES, August 28, 2026 /EINPresswire.com/ -- Forza Logistics Group is expanding its investment in freight security through [**Forza Shield™**](#), its multi-layer carrier verification and fraud-prevention program.

“

Being a smaller brokerage does not mean having smaller capabilities. We built Forza Shield™ to identify risk before it becomes a loss.”

Nicholas Mascari

While Forza may be a smaller brokerage, the company has built a technology stack designed to provide enterprise-level protection for refrigerated, high-value, and sensitive freight.

“Freight fraud has changed, and the way brokers protect freight has to change with it,” said ****Nick Mascari, Founder and CEO of Forza Logistics Group****. “Being a smaller brokerage does not mean having smaller capabilities. We have invested heavily in technology, identity verification, freight intelligence, and real-time visibility because protecting our customers’ freight is just as important as moving it.”

Forza Shield™ incorporates technology and intelligence from ****Highway, GenLogs, Carrier411, MacroPoint, and E3 Group****, along with Forza’s own operational controls.

Together, these tools help support carrier identity verification, fraud detection, driver verification, carrier monitoring, network intelligence, and real-time shipment tracking.

Forza also uses authority checks, insurance validation, equipment verification, and enhanced security protocols based on shipment risk.

Rather than relying on one database or one verification method, Forza Shield™ is designed around multiple independent layers of protection.

“For us, the goal is simple,” Mascari said. “Identify the risk before it becomes a loss. We may be a small broker, but our technology stack is mighty.”

Forza has also worked with state and federal law enforcement in connection with cargo-theft investigations and suspicious carrier activity.

About Forza Logistics Group

Forza Logistics Group is an Indianapolis-area freight brokerage specializing in refrigerated, high-value, dry van, and complex freight.

Small broker. Mighty tech stack. Multiple layers of defense.

FORZA SHIELD™
MULTI-LAYER CARRIER SECURITY & FRAUD PREVENTION

Every shipment is protected by the **Forza Shield™ Security Protocol**, a comprehensive, multi-layer verification process designed to reduce the risk of fraud, cargo theft, double brokering, unauthorized pickups, and carrier-related disruptions before your freight is ever loaded.

At Forza Logistics, we do not simply assign a carrier. We verify every transportation partner through multiple independent security, compliance, and intelligence platforms to help protect your freight from origin to destination.

WHAT THIS MEANS FOR SHIPPERS

- Greater supply chain security
- Fewer service disruptions
- Reduced exposure to fraud
- Stronger protection for high value shipments
- Greater confidence that the right carrier, the right driver, and the right equipment arrive for every pickup

Most importantly, it means you have a logistics partner that takes ownership, communicates proactively, and is committed to protecting your freight before problems occur, not simply reacting after they happen.

THE FORZA SHIELD™ PROMISE

We believe protecting your freight requires far more than checking a carrier's authority or insurance. That's why we built Forza Shield™, a comprehensive security protocol containing advanced technology, independent verification, and operational expertise to help safeguard every shipment.

OUR TRUSTED TECHNOLOGY PARTNERS

- GenLogics
- HIGHWAY LOAD LOCK
- Carrier411
- MACROPOINT
- E3 GROUP

BECAUSE PROTECTING YOUR FREIGHT STARTS LONG BEFORE THE TRAILER IS LOADED.
