

EBO2 Therapy & Wellness Expands to Florida With New West Palm Beach Location

Physician-supervised concierge longevity practice brings personalized cellular wellness, recovery and advanced oxygenation protocols to South Florida

WEST PALM BEACH , FL, UNITED STATES, September 1, 2026 /EINPresswire.com/ -- WEST PALM BEACH, FL — [EBO2 Therapy & Wellness](#), a physician-supervised concierge longevity practice, has expanded its national presence with the opening of a new location in West Palm Beach, Florida.

Located at 580 Village Boulevard, Suite 200, the [West Palm Beach clinic](#) marks the practice's expansion into Florida, building upon its established presence in Rancho Palos Verdes, California. The new location is now accepting patients for private, complimentary consultations.

The expansion introduces EBO2 Therapy & Wellness's highly personalized model of care to South Florida, providing individuals with access to physician-supervised protocols designed around how they live, recover, perform and age. Each patient experience begins with an individualized consultation and screening process, allowing the clinical team to develop recommendations based on the patient's health history, lifestyle and personal wellness goals.

The decision to expand into West Palm Beach was driven by growing patient demand and EBO2 Therapy and Wellness's commitment to making its services more accessible. With patients already traveling from across the country to visit its flagship center, the new location represents a strategic step toward establishing a presence across both coasts—and, ultimately, nationwide—as EBO2 continues its mission to become the country's leading destination for EBOO and regenerative medicine.

Ebo2s new West Palm Beach location, with beautiful greenery and amazing sunny windows

“Expanding to West Palm Beach allows us to bring our personalized, physician-supervised approach to a community that places a strong value on proactive wellness and longevity,” said Dr. Daniel S. Moghadam, Medical Director and Chief Medical Officer of EBO2 Therapy & Wellness. “Our goal is to give every patient the time, education and clinical guidance needed to make informed decisions about their care. This location represents an important step in making that experience available to more people while maintaining the individualized attention and high standards that define our practice.”

The West Palm Beach clinic offers EBOO (also referred to as EBO2/[EBO3](#)) therapy, alongside therapeutic plasma exchange; hyperbaric oxygen therapy; IV and NAD+ protocols; ozone therapy; red light therapy; peptide protocols; and regenerative biologics. Services are personalized through consultation, appropriate screening and physician-guided planning.

EBO2 Therapy & Wellness was created to provide a more considered approach to modern longevity care—one centered on physician oversight, education, transparency and individualized service. Rather than relying on standardized programs, the practice develops personalized protocols developed around each individual's wellness goals, lifestyle and clinical screening.

The West Palm Beach opening reflects the practice's continued growth and its commitment to expanding access to advanced wellness services within a calm, discreet concierge environment. With locations in Southern California and South Florida, the practice is expanding its concierge model while maintaining its focus on individualized screening, physician oversight and patient education.

The West Palm Beach clinic is located at 580 Village Boulevard, Suite 200, West Palm Beach, Florida 33409. To schedule a private, complimentary consultation, call (561) 568-5111 or visit <https://ebo2therapy.com/consultation>.
