

Admera Health Partners with AJIA to Expand Genomic Access for Early-Career Investigators

SOUTH PLAINFIELD, NJ, UNITED STATES,
September 1, 2026 /EINPresswire.com/

-- Admera Health announced a strategic partnership with the [American Junior Investigator Association](#) (AJIA) to provide early-career investigators with expanded access to advanced genomic, transcriptomic, and multi-omic technologies. The partnership was announced at America's Got Research

(AGR), AJIA's inaugural national competition at the Yale Club of New York City, where more than 200 leaders from academia, biotechnology, venture capital, and philanthropy gathered to celebrate the next generation of biomedical scientists.

“

At Admera Health, we believe transformative science should not be limited by access to technology. We are proud to stand alongside AJIA in supporting the next generation of investigators.”

Yun Zhao, CEO, Admera Health

Under the partnership, AJIA members will receive exclusive pricing on Admera Health's comprehensive suite of genomic and bioinformatic services, along with access to pilot and proof-of-concept (POC) grants—directly addressing one of the most persistent barriers facing emerging researchers: the high cost of advanced molecular tools at a career stage when funding is most limited.

Empowering Investigators Before the Lab Is Established
Early-career investigators — postdoctoral fellows, junior faculty, and physician-scientists in training — are generating the foundational science that will define future therapies, diagnostics, and patient care. Yet this critical

stage is also when access to cutting-edge technology is hardest to secure. Admera Health's partnership with AJIA directly addresses that gap, enabling promising investigators to pursue high-impact molecular analyses needed to generate competitive preliminary data and build the scientific foundation of their careers.

AJIA was founded by physician-scientists Jennifer Kwan, MD, PhD (Yale School of Medicine) and

Evan Noch, MD, PhD (UT Southwestern) to strengthen the physician-scientist pipeline through mentorship, advocacy, and community. Through events like America's Got Research, AJIA has built a national platform that elevates early-career scientists and connects them with the broader biomedical ecosystem. MD-PhD candidates and early-career physician-scientists are encouraged to join AJIA to take advantage of this partnership and the broader network it provides.

Advanced Technology, Dedicated Support

Admera Health is a trusted partner in advancing research through expert scientific support and advanced laboratory services. Operating in a CLIA/CLEP-certified and CAP-accredited environment, Admera offers a comprehensive suite of services — including [RNA-seq](#), [single-cell RNA-seq](#), spatial transcriptomics, WGS, WES, methyl-seq, ATACseq, and advanced bioinformatics — serving researchers across academia, biotech, and biopharma from exploratory to clinical applications. AJIA members also receive dedicated scientific consultation to help design and execute their projects with confidence.

“At Admera Health, we believe transformative science should not be limited by access to technology. We are proud to stand alongside AJIA in supporting the next generation of investigators.”

Yun Zhao, CEO, Admera Health

How AJIA Members Can Access Benefits

AJIA members can access exclusive member pricing and learn more about pilot grant opportunities by visiting www.admerahealth.com referencing their AJIA membership. A dedicated Admera scientific liaison will work with each investigator to identify the right services and project design for their research goals.

About Admera Health

Admera Health is a trusted provider of advanced genomic and bioinformatic services, operating in a CLIA/CLEP-certified and CAP-accredited environment. Admera serves researchers across academia, biotech, and biopharma with a comprehensive suite of NGS services and expert scientific support. To learn more, visit www.admerahealth.com

About the American Junior Investigator Association (AJIA)

The American Junior Investigator Association is a national nonprofit dedicated to supporting early-career physician-scientists through mentorship, advocacy, and community building. Founded by Jennifer Kwan, MD, PhD, and Evan Noch, MD, PhD, AJIA works to strengthen the biomedical research workforce and empower the next generation of scientific leaders.
